Don't Spend A Single Penny To Get Your Business Listed Prominently On Google Dear Business Owner, It's true! The Internet is the way forward to get more custom to your business. You don't need to spend a small fortune on Yellow Pages ads, radio commercials, or getting listed in the newspaper. (And, yes, I really do mean a small fortune! Have you seen how much Yellow Pages ads are running these days?) All those methods are old hat! They're stuck back in the 20th Century. Paying For Local Advertising Is Out! You Need To Move Your Publicity Machine Online! Getting attention online is easy. You just need to advertise. But, how do you get going if you've never advertised online before? You Could Hire A Marketing Consultant. That will work, but they're going to charge you the big bucks for setting up an online listing which you could do in a matter of hours. And, they won't know all the secret insider details of your business (you really want to share those with a stranger? - yeah, sure you do). You Could Pay Google For Advertising. I've seen so many victims lose their shirts doing that. And all for nothing in return. You Could Set Up Your Own Low-Rent Web Site. However, if it doesn't look professional, you're harming your business. And, I've seen lots of non-professional looking web sites. That is, if anyone even knows about, and visits your site. Without visitors, your site is worthless! You Need To Use Google's Free One-Stop Solution What if I told you that Google has its own free promotional service that very few people know about. And the service will get your business listed in a prominent position right where your customers search for it. You'd think I was 'yanking your chain', but this service really exists. It's called Google Places. It will get you all the online visibility you need. And the best thing? Your Competitors Don't Know About Google Places That gives you a huge advantage in the local market to take the lead advertising positions away from them, and all for nothing. And all for following a quick and easy process, without needing to leave the comfort of your home, or hire an overpriced consultant. Google will tell you everything you need to know to set up a listing with Google Places. But, they don't make it easy on you. They use tech speak. And, they don't share with you all the insider tips you need to get your business in the most dominant position in the search engine listings. The good news? I've got the solution right here for you. Introducing Google Places Goliath I've scoured my way through the complicated Google
