Sunless Tanning Guide MASTER RESALE RIGHTS INCLUDED! Enjoy A Tan All Year Long! Sizzle without the Sun! Now in under 5-Minutes & the time it takes to grab your tanning lotion, swim suit, and flip flops... You can lighten your tanning worries & darken your skin; in short...get help now with The Sunless Tanning Guide! But maybe people have been telling you that you can get skin cancer if youre out in the sun too long? So you think about a tanning booth or tanning lamp... But people say that theyre not safe either. So you check into other tanning solutions. You find there are many: tanning pills, tanning lamps, tanning lotions, tanning gels, tanning acceleratorsugh! What happens over time? Maybe some of these: - You try some tanning products. You turn orange. - Your hands and clothing, not to mention your favorite chair and bathrobe, were tanned and stained - - in the process. - Your tan starts flaking and you arent sure what to do. - You dont know how to tell which tanning products are safe. SPF stands for Should Put First, right? But youre still safe out in the sun, right? - You arent sure whether to moisturize first, exfoliate last, use tanning solution in the middle? You wonder what you really need. And in what order..? - You quit - - for now and head back to the tanning booth, fully intent to pick up your sunless tanning research and experiment where you left off sometime next week. Or maybe next month over a weekend sometime. Or maybe next year at this time. Or...whatever. Right. Well, forget all that. Weve already completed the work for you. And our report is right here, ready to be instantly downloaded in a click. So theres no need to turn back now and burn under those heat lamps. Relax for a few minutes and check out what we have to offer! Its easy, efficient, effective. Dear Tanning Friend, Life can really burn you. Any time. Any age. Literally! For example, you can be out in the sun for only a couple hours in the afternoon. Then later you hit the sack, wake up red and burned, and hurt because of the effects of the suns rays. And yet: - You thought getting a little tan the day before would have protected you from burning. What happened? - You applied sunscreen early in the morning that was supposed to last all day long. What went wrong? - You cant remember what to do for sunburns. Should you apply butter to the area? Well, read on. Well help you get answers to these questions and many more. In fact, right now, were inviting you to take charge of your own tanning plans and learn more now about how to tailor them to suit your daily activities and needs.

The Sunless Tanning Guide will help even when exciting opportunities pop up along the way to change your plans during the day. For example, staying outdoors in the sun longer than you intended and sweating off your protection a little earlier than planned will no longer have to be issues that can cause burns. You will be able to get help from us while staying in charge of your own tanning regime. Quickly and easily download our research and get help today to avoid further tanning goal set backs, painful burns and unhealthy skin problems. And learn what The Sunless Tanning Guide is all about. To begin, simply consider the following 3 statements. Are they True or False? 1. Approximately every hour, one person dies from skin cancer and one out of every five Americans will develop skin cancer during their lifetime. True or False? 2. And a little bit of tan protects you from the sun. True or False? 3. People with lighter, fairer skin have less melanin, absorb less UV rays and suffer less protection. True or False? (Answers: 1. True 2. False 3. True) Learn a whole lot more by grabbing your copy of our latest research. Its loaded with information in an easy-to-read format, available instantly upon receipt of your payment.
