

The One Stop Rss Machine Software Package

[DOWNLOAD HERE](#)

One Stop RSS Machine package by PhoenixFiresale includes Rss scripts, Rss software utility like Rss submitter and lots more. It also includes guide as to how you can get listed on Yahoo free. What is RSS : RSS (Really Simply Syndication / Rich Site Syndication) is a popular way to pull in news and information from around the Web. Rss allows web sites and blogs to push free web content to you easily. You should provide an RSS feed if you want to distribute your information to a vast and fast growing community of users, who are actively looking for information on your topic. Few simple reasons WHY YOU SHOULD KNOW ABOUT RSS Because this is going to be the hottest way of providing regular information updates, fresh content in the coming years. It will help you get a free listing on Yahoo (more info in package - Ebook, Yahoo promoter). Improve search engine rankings. If you wish to popularise Product catalogs Newsletters Web site content Newsletters Press releases Job openings, purchase requirements Emails / Newsletters / Ezines You might be aware that most emailed newsletters do not reach more than 30-40% of the subscribers because of spam filtering, blacklisted domains and several other reasons. Email address extractors, Bulk email extractors and email harvesters for email marketing are outdated. The world is fast moving from a push-based information delivery (where you send information via emails) to a pull-based information delivery (where the subscriber accesses your information as and when he wants). Embracing RSS technology right now can put you on the fast track and give you an edge over your competitors who are slow in adopting this hot new technology. Tags: im, plr, rss
