

# Virtualbox Mandriva Linux One 2009 Kde4 Virtual Disk Image

[DOWNLOAD HERE](#)

-= Mandriva Linux One 2009 KDE4 =- This is the Distribution Release of Mandriva Linux One 2009 KDE4. Mandriva Linux 2009 just as expected, an excellent selection of preinstalled applications with well a beautiful desktop environment. The KDE desktop (KDE4) binds the entire system into a very usable virtual desktop. Mandriva 2009 integrates automatically with VirtualBox. We did not install the VBoxGuestAdditions. Mouse integration and Display Auto-Size are all functioning perfectly.
