

Securebux V2

[DOWNLOAD HERE](#)

SecureBux is a paid to click script based on PHP. It has been built from the bottom up to be secure, easy to use, and search engine friendly. We have used the purest of code to make sure it is optimized for every web browser. This script is compatible with any MySQL above 3.x and works with any PHP enabled server (every single one has PHP these days). SecureBux uses a small amount of server load and hardly puts any stress on your database. The script has been created to be easy to use for both administrator and member. Members can easily get where they want to with one click, and administrators can edit all their information from the admin panel. Earning possibility and other statistics shown throughout the site use an algorithm to update automatically; saving you the stress of manual page edits. No more worries about those annoying hackers that can cause you thousands in losses. We have made sure this script is unshakeable. Computer experts have performed vigorous testing and we have made all changes to eliminate possible security breaches. Your website and members are safe. Tags: ptc, gpt, bux
