Right Click Income Version 3.0.1 Website thieves have been using the right mouse button to steal text and graphics out from under your nose! Version 3.0.1 is Live Here! Today is the day you block website thieves, reward your real customers and generate cash on demand--all with one simple mouse click! Plus, if you act fast, get a special bonus that will propel your website into the world of Web 2.0! Do you think most people are good, honest folks? I'd like to think so. It would certainly make a better world if they were. But sometimes people can be tempted, especially if dishonesty is really, really easy. Well, how easy is it to click the right mouse button? That's right, it's pretty easy! Maybe you've spent days, weeks, even months putting together just the right words and pictures for your website. Did you know that a right-click web thief can steal the fruit of your labor in mere seconds? All it takes is three steps: select, right-click, copy. Perhaps you paid hard-earned money to a ghostwriter for unique content...only to have that content show up on another website within days. Why would a dishonest webmaster buy content when they can select, right-click, copy? Have any exclusive photos on your site? Forget them, they're exclusive no more. Select, right-click, save image. Even those one-of-a-kind website graphics from your expensive designer. They were going to be your exclusive brand, but now they're popping up everywhere. It's just select, right...oh well, you get the picture. If you have a website, this petty theft can be irritating or may even make you feel violated. If your website is how you make money, then these right-clickers are stealing from your dinner table. Mark this day on your calendar, because it's the day you take back your website! Today--in fact, just minutes from right now--you could have a website that says NO to right-click website thieves. With the Right Click Income Version 3.0.1 script, you can protect every pixel of your precious website and put dishonest surfers on notice that you're not going to sit back and take it any more! The Right Click Income script will detect each and every website burglar that tries to take what's yours, will completely deny them access to your digital property, and will instantly warn them to move on. But Right Click Income Version 3.0.1 is more than a powerful protector. It's an on-demand cash generator! Sometimes people right click on your site for perfectly innocent reasons. Wouldn't it be great to give them something to look at when they right click? Wouldn't it be really great if it was something they could buy?

Who knows, maybe even someone who was tempted to make off with pieces of your site will suddenly see that your products are worth a second look. Right Click Income Version 3.0.1 does more than just show dishonest people the door. It also opens a window! Thats right, this amazing little script can actually lead your visitors to a new buying opportunity that can literally explode your profits. A right click on your site becomes a trap door to buried treasure. Visitors will feel like theyve stumbled onto a special deal and youll have their undivided attention for your special offer. By the way, have you tried right-clicking on this website? Heres what you get if you buy right now: \* A complete, easy-to-edit mini-site template thats pre-coded with the Right Click Income Version 3.0.1 script, Header and footer images ready to easily add your website title \* A matching order button that just begs to be clicked \* The Right Click Income Version 3.0.1 script you can use on your other websites \* A One Time Offer template for your visitors to find \* 6 different easy-to-edit testimonial boxes--use them anywhere \* A video tutorial that shows how easy it is to edit the templates \* Free Support \* Discount Upgrades when new version will be realased to existing customers See full Mini Site template you may get in next 5 min. from now - [HERE](#) - Right Click Income Version 3.0.1 script Included But wait, what about Web 2.0? Did you notice how all the graphics on this page have an eye-catching reflection? All the really hot new websites have this look--and now you can have it too! Well include the Ajax Web 2.0 Reflect Images script at no extra charge! With this great reflection script, you can easily modify the amount of reflection. Can you just imagine how great your site will look with this? So, how much will this cost? Normally, cutting-edge web technology like this could cost you as much as \$97 or even more. But I really love what I do and Id like to make it available to as many people as possible (and my friends think Im certifiably crazy). You can get this package today for a fraction of what its worth. Only \$? gets you everything--IF you order now. You see, Im not as crazy as everyone thinks. The price is set to increase every hour. So if youre here now, this is the lowest price youll see. Remember, youre getting the Right Click Income Version 3.0.1 script, a pre-coded mini-site template, header and footer images, a matching order button, testimonial boxes, a video tutorial AND the Web 2.0 reflection script--all for one astonishing low price.
