Simple Optin Script

[DOWNLOAD HERE](#)

Simple Optin Script SimpleOptIn is an easy way to set up your very own confirmed opt-in mailing list system using PHP and MySQL. A confirmed opt-in list ensures that no one gets your email without requesting it, by requiring subscribers to verify their subscriptions before they receive any messages. This is the responsible way to run a mailing list, and it will cut down or eliminate the possibility of your mail being viewed as spam. FEATURES Run a confirmed opt-in mailing list Subscribers must validate their subscription requests Unique unsubscribe links for each recipient are automatically generated and appended to each message Ensures that every subscriber is "double opt-in," because they opted in first at your web form and then again through the confirmation message Prevents bogus, accidental, or malicious signups to your list Send your mailings the responsible, anti-spam way Installer script included SUPER BONUS: Order now and receive MASTER Resell Rights so you can sell Simple Optin Script and keep 100 $$$ of the profits! You'll even get a copy of this sales page which you can easily customize!
