

# Gas Prices Directory Script

[DOWNLOAD HERE](#)

Here is our Gas Prices Search Engine directory. This PHP script is packed full of features and options for the administrator. For the user: Gas stations or visitors are able to post the local prices of the cheapest gasoline they could find in their area. Others can search the database to find the cheapest gas prices. With recent gasoline prices souring through the roof, this website script is sure to bring massive amounts of traffic to your site and keep them coming back time and time again. The user can search by country, state, zip code, category just to name a few. Each listing pulls up a mapquest map for the visitors to find the location of the gas station and even print the map. You control everything from the unlimited categories to weather or not to charge for the postings (PayPal IPN built in) If the looks of the site don't impress you, simply edit the templates in the template directory using your favorite html editor and copy/paste the changes back into the templates. This is a one of a kind script that can be found no where else.
