Top Sources For Free Backlinks FREE GIVEAWAY RIGHTS INCLUDED! I believe you already know that search engine traffic is any webmasters dream: its free, highly targeted and incredibly profitable. Theres nothing like it. If you have a website and you want to make real money with it, you should familiarize yourself with search engines and SEO (search engine optimization). In a nutshell, heres what you need to do: - on-site optimization (that includes a couple elements like: make sure you have your keywords in the page title and throughout the text, insert alt tags to all images, write a good description, add meta tags, simplify your interlinking structure) - off-site optimization: getting relevant links pointing to your site... Now, the on-site optimization is quite easy to do and you only have to do it once. The second part though, this is where it gets tricky. Most webmasters do their on-site thing, but fail to do the second part, which is more important than the first. The reason? They dont know where to get these backlinks they need.
