Attention: If You Manage Any Large Content Sites, Then This Amazing New Tool Saves You Hours of Time! Discover How You Can Pop Thousands of Your Articles Into Pre-Designed Web Pages And Upload Them To The Web With A Few Clicks of Your Mouse! Never Spend Hours Manually Inserting Your Articles Into Web Pages Again! Now, You Can Save Countless Hours Of Time With New Autopilot Software! Putting Your Content Management On Autopilot With The Power of Software! Let me introduce you to a new tool called, Article Indexer. Article indexer is a new tool that takes your articles in text format and automatically converts them into pre-designed HTML pages. Then, you can have it upload your pages directly to your website. All you have to do is a click a few buttons and all of the hard work is done for you! Countless hours of effort are now transformed into a few minutes of pointing and clicking. Time that used to keep you glued to your computer is now wide-open! Heres The Full Range of Benefits You Get: Advanced template system creates and stores any number of page templates you want your articles popped into! This ensures every page looks alike and you are satisfied with the final look! Have a master index page where links to all of your new articles are placed and have it automatically published to the web. This is vital if you want the search engines to find all of your new content! Alphabetize your articles with the the click of a button to keep them organized! This feature is invaluable when youre dealing with hundreds of pages! Choose to display snippets of the articles within the index so that readers can quickly find the information theyre looking for. As a result, your user activity and revenue skyrocket! Enjoy a convenient option of determining how much (or how little) will be displayed on the article index pages. You have full control of what you new website looks like! After the articles are created, spit them out into a folder on your computer or directly up to your website! Getting your new web pages created and online only takes minutes! Create web pages in all of the desired extensions, including php, html, htm, or asp. Whatever you need, its included! Plus, much many usability features to make managing your content a breeze!
