FaceBooking Craze For Internet Marketers Why Internet Marketers Should Use FaceBook, How It Can Help Grow Your Business And How To Get 500 Friends In 30 Days! In marketing circles, there is a great deal of talk about FaceBook. FaceBook is a social networking site that came quietly into the Internet scene in early 2004 and at that time, it was geared towards college students only. Friends and soon to be friends can be located with their email, by region or city, by profession, by their school, or numerous other options. Once a person has joined your circle of friends, you can interact with them by sending them messages or leaving notes on their profile, which is essentially called writing on ones wall. A lot has changed in 4 years and now anyone over the age of 13 can open a free account at FaceBook and start interacting with others. Today, there are more than 80 million people using FaceBook. Since FaceBook has become open to non-college students, some of the most famous Internet Marketers, including John Reese, Mike Filsaime, Willie Crawford, and Edmund Loh have found that the social networking site is more than just a way to connect with old friends and to meet new friends, it can also be used as a valuable marketing tool.
