This Manual / Handbook covers the IH International Harvester McCormick B250 and B275 Tractors. The following is taken directly from the Manual / Handbook: This book has been prepared for the convenience of servicemen who will be carrying on work on the B-250 and B-275 tractors. The contents consist of information on work that a serviceman is likely to be called on to do anytime, not necessarily overhaul. Particular emphasis is placed on the single drop arm steering as used on the later B-250 tractors, which is not covered in preceding manuals. The introduction of CRPTO (Constant running power take-off) in the B-275 has necessitated some information along this line which is also covered in this manual. Other information contained will be of interest to the serviceman working on these tractors. Navigation is simple with convenient chapter bookmarks and ability to search by keyword.
