The extension .diz is used to enable you to put the whole product directly in a blog tool. This way you do not need to fear, that these lists/descriptions (a.k.a. not-babies-content) are published on your site. The blogging tool should only process .txt-files. Therefore .txt is used exclusively for publishable babies content, but not for internal information. It is just used to make your life easier. Get 25 babies PLR articles, #1 now! Tags: babies cash
