Attention: Get More FREE Search Engine Traffic From Your Content By Instantly Analyzing Its Keyword Density With A Few Clicks! "Get More Targeted Search Engine Traffic With Articles Optimized To Give You Prized Rankings That Explode Your Sales!" If You Regularly Write Articles, Press Releases, Blog Entries, Or Any Type of Content You Publish On The Web, Then You Can Dramatically Increase Your Search Rankings With This Easy-To-Use Tool! Dear Friend, Getting your content listed in the search engines is the key to profiting from your efforts. If your articles, press releases, or blog entries fail to get a good rank in the search engines, they often end up being worthless to you. This is why it's essential that you make sure your articles are optimized for the search engines. One of the most important ways to do this is to make sure you have the right keyword density for the search terms you want to get ranked for. If you include your keyword too much, then you're going to likely get penalized. If you don't put it in not enough, then you'll miss the mark of what the search engines want. Simply put,... To Reap Large Amounts Of Search Engine Traffic You Must Get Your Keyword Density Exactly Right! Of course, you can go through all of your articles and compute your keyword density manually. But, this takes forever with more than one or two articles. Or you can make sure you have the perfect density every time and within seconds using a new tool called, "Article Analyzer." Article analyzer is a piece of software that automatically computers the exact keyword density with a few clicks of your mouse. As a result, you can rest assured your articles are optimized to claim profitable search engine rankings! Here's The Full Range of Benefits You Get: Quickly "test" all your articles prior to publishing them on the web to make sure you don't waste all of your effort! Relax knowing all of the time spent on each article is likely to pay off! Ensure your keyword density is accurate for easy search engine approval. Never miss-judge whether an article is going to hit the bullseye, costing you a prized profitable search engine ranking you could've easily had! Quick catch and correct any spelling errors that might exist with built-in spell-checker. Nothing's worse than working for hours over an article and having an overlooked spelling error limit its success! Get the word count, the number of times a chosen word or phrase occurs throughout the content, and the density

percentage. All of the data to make smart decisions so your articles pay handsomely are here! Save each article in either .txt or HTML format for full flexibility and saved time! Your content is ready for you to submit to directories, online newswires, or publish on your website! Quickly spot your keywords inside your article with built-in highlighting feature! This is a huge time saver when you're trying to edit your articles! Plus, more features to save you time and give the information you need to succeed with your content! The bottom-line of why this tool is so important to your success comes down to this question... How Much Time, Effort, and Money Are You Throwing Away With Content That Fails To Get Ranked In The Search Engines? Just consider... if you create 10 articles and only 6 of them get in the search engines, then 4 articles are going to produce absolutely nothing after they're first published. You wasted your effort or money if you hired a writer. Yet, this is what happens far more often than it has to. Simply run your content through Article Analyzer to ensure the search engines are going to like it. As a result, you're likely going to make far more money from your content.
