Now is the time to act and stop URL hi-Jacking on your site and on your Affiliate links. Cloak URL is one of the best but most importantly, simple to use cloaking tools on the world wide web. The software is also useful for encrypting web pages you create, as it randomly generates a cloaked link, which you can set up on your website. This product is excellent value for money, and although you will find plenty of cloaking facilities on the internet, most are web based and allow you to encrypt an URL which you copy and paste or write down to remember.
