ATTENTION: If You Want to Virtually Guarantee You'll Be One of the Elite Internet Marketers of the Future Then Don't Close This Page Until You've Read Every Word Here's How You Can Instantly Gain an Almost Unstoppable Edge On Your Competition, Increase Your Sales Conversions, and Build Your Profit Margin to Massive Proportions with This Brand New Secret Tool In Less Than 60 Minutes From Now You Can Be Creating Your Own Money-Making Software without Knowing a Single Thing About Writing Code or Without Having to Hire One of Those Expensive Programmers. Dear Customer, Can I ask you a quick question?... Would you take a pocket knife to do battle with a military trained sniper? Of course not... how absurd would that be? So why would you want to do battle in the internet marketing arena with inferior products? First, you're probably curious about what this is all about. Who wouldn't be? To make this as crystal clear to you as possible and to help you understand why this letter is so important I'd like to paraphrase a story written by James Wallace... On October 28, 1955, shortly after 9:00 p.m., a baby boy was born. Unknown to any one at the time this tiny infant would soon have a profound effect on the modern world and significantly affect the way we do business, the way we communicate and the way we view life. Born into a family with a rich history in business, politics, and community service. His great-grandfather had been a state legislator and mayor, his grandfather was the vice president of a national bank, and his father was a prominent lawyer Early on in life, it was apparent that this exceptional boy inherited the relentless drive, vast intelligence, and competitive spirit that had helped his family rise to the top in their chosen professions. In elementary school he quickly surpassed all of his peer's abilities in nearly all subjects, especially math and science. His parents recognized his intelligence and decided to enroll him in a private school known for its intense academic environment. This decision had far reaching effects on the boy's life. For it was here that this young boy was first introduced to computers. In the Spring of 1968, the private school decided that it should acquaint the student body with the world of computers. Computers were still too large and costly for the school to purchase its own. Instead, the school had a fund raiser and bought computer time on a program sponsored by General Electric. A few

thousand dollars were raised which the school figured would buy more than enough time to last into the next school year. However, the prestigious private school had drastically underestimated the appeal this machine would have for a hand full of young students. A few of the students immediately became inseparable from the computer. They would stay in the computer room all day and night, writing programs, reading computer literature and anything else they could to learn about computing. Soon this young genius and the others started running into problems with the faculty Their homework was being turned in late (if at all), they were skipping classes to be in the computer room and to the astonishment of all, they had used up all of the schools computer time in just a few weeks. In the fall of 1968, Computer Center Corporation opened for business in Seattle. It was offering computing time at good rates, and one of the chief programmers working for the corporation had a child attending this same private school. A deal was struck between the school and the Computer Center Corporation that allowed the school to continue providing it's students with computer time. Soon, the now 13 year-old boy and his cohorts immediately began exploring the contents of this new machine. It was not long before the young hackers started causing problems. They caused the system to crash several times and broke the computers security system They even altered the files that recorded the amount of computer time they were using. They were caught and the Computer Center Corporation banned them from the system for several weeks. Of course this didnt stop them. In fact, late in 1968, four of the school-mates formed the Lakeside Programmers Group. They were determined to find a way to apply their computer skills in the real world. The first opportunity to do this was a direct result of their mischievous activity with the school's computer time. The Computer Center Corporation's business was beginning to suffer due to the systems weak security and the frequency that it crashed. Impressed with the computer addicts' previous assaults on their computer, the Computer Center Corporation decided to hire the students to find bugs and expose weaknesses in the computer system. In return for the Lakeside Programming Group's help, the Computer Center Corporation would give them unlimited computer time. The boys could not refuse. One of the boys was quoted later as saying "It was when we got free time at C-cubed (Computer Center Corporation) that we really got into computers. I mean, then I became . It was day and night". Although the group was hired just to find bugs, they also read any and every piece of computer related material that the day shift had left behind. The young hackers would even pick employees for new information. It was here that Bill Gates really began to develop the talents that would lead to the formation of Microsoft seven years later.

There's no doubt that you are aware of the incredible fortune made by Bill Gates of Microsoft simply by creating software. Certainly he's not alone but Bill is one of the most well known success stories in the world... Perhaps right about now you're saying to yourself... Why in the hell should I care about Bill Gates' billions and what in the world does all this have to do with my business? Do you really expect that story to help me with my marketing success? Gimme a friggin BREAK!... Before you go stomping off and cursing me out for wasting your time you must know this... Bill Gates made his fortune by making people's lives easier! Period. It's a proven fact that if you can come up with any thing that will make people's lives simpler and easier... it WILL sell! So, stick around, because I'm getting ready to give you some MAJOR Internet NEWS that can virtually catapult your success completely out of the galaxy! This is NOT the time to beat around the freaking bush. I can guarantee you that your competition (at least the ones you need to worry about) are NOT sitting on their pretty little laurels and picking their nose and wondering what they are going to do next to rake in the big profits you only WISH you could make! With This Mind-Blowing Marketing Tool You Could Be Saying Good-bye to Failure FOREVER! It's no secret to anyone that you can rake in incredible profits selling software. I'm talking millions... and perhaps even billions. Obviously not everyone is capable of creating windfalls of this magnitude but you get the picture. And, of course, not everyone has the technical skill and knowledge to create software. The development costs are staggeringly high... as in hundreds of thousands of dollars for some software applications. Not to mention the time it takes to write the program. Who has that kind of time, money, or knowledge? NOT MANY... Imagine, though, if you could just skip all the rigmarole that comes with research, development, programming, packaging, etc. - and just get down to making software! Would that be a riot? As utterly crazy as it sounds it's not impossible... in fact, it's down right easy with my new program called... Software Designer Pro Imagine Being Able To AUTOMATICALLY Create Professional Looking Profit-Pulling Software Applications In Just 9 Incredibly Simple Steps... all in About 30-60 Minutes!" What if you could have a professional software designer on retainer for you 24 hours a day 7 days a week that could create software applications whenever you wanted all for just a one time low payment? Imagine the money you could save or better yet imagine the potential profits you could bring in by creating and selling your own software! Sound like a pipe dream?... Well its not. And in a minute Ill show you exactly how you can get this amazing software generating tool for your own use. Do you have thousands of dollars just lying around to hire a programmer to write code for your next software idea? I would venture to say probably

not. Do you have the time to learn programming language and write the code yourself? Maybe if you don't mind waiting ten years before you'll be any good at it. Now imagine this: You've just come up with an idea for a software application that could significantly help solve a nagging problem in your niche. What do you do next? Do you just sit there wishing you could find someone to design the software for you, do you wallow in self-pity because you know you are about to miss the profit boat again simply because you don't have the resources to make your idea a reality or do you open your software-generating program, put in the recipe and whip out that new software within the hour. Personally, I prefer the latter. It's already a proven fact that people not only love software, they will pay for it. Most folks are lazy and if you can provide a legitimate alternative to work they'll jump all over it. Now there's an affordable way to create your own software without spending a fortune! Why should only a select few have the chance to make their own software? Everyone should have a fair chance to create and sell their own software without going into eternal debt or maxing out their credit cards. Thanks to this exciting design in software technology, you can make practically all the software you want instantly at the push of a button. You'll never have to waste your time or money again. This powerful new software will generate as many applications as you want; you are only limited by your imagination. New to Internet Marketing? That's fine too! Because Software Designer Pro is designed so even the newest of marketers can use it without difficulty. There are no scripts or codes that you have to enter and figure out on your own. You won't spend hours on complicated programming tasks or writing code. Just pop in a recipe and voila! You're just a few clicks away from creating your very own software application any time you want! Plus, we've included an easy-to-understand quick start guide that will show you exactly how to get the most out of your software maker and maximize your income at the same time! You'll truly be amazed at all the things this one piece of software can do. Here are just a few of the virtually countless ways you can benefit from using Software Designer Pro Unlimited Software Applications at the push of a button. If you hire a programmer to design your software, you get one application period. Not only does it take a long time but all (or a good portion) of your budget goes into development costs before you even have a chance of seeing one dime in profit. Not so with Software Designer Pro. Your design costs are virtually zero (you pay for the software creator one time and you're done) and you can create unlimited applications all with just a few clicks of the mouse. Save Time and Money Thanks to Software Designer Pro, you'll no longer have to spend a huge amount of your valuable time creating products. With the hours you'll save you can

spend more time on the things you enjoy most. Plus, you'll have more time to focus on the marketing aspect of your business and not the product development phase. Potentially Explode Your Sales and Income With the ability to create unlimited software applications there's truly no limit to what this can do to your sales and profit margin. Whether you create software to sell or software to give away you can create almost an unlimited stream of potential profit generating applications. No Complicated Scripts or Programming Required You don't have to enter any complicated codes or be an expert programmer to use Software Designer Pro. This is truly a hassle free piece of software. Just pop in a recipe (we'll show you exactly how in the quick start guide), fill out the required information and with the click of your mouse you'll have a ready-to-go software application that is all yours. You've seen it before... people raking in fist-fuls of profit from all types of software... headline creators, sales letter generators, web page creators... the list goes on and on. The concept is really simple... Find a problem... make a software application that makes it easy to deal with... and you've got an instant recipe for success. You could be one idea away from becoming the next software tycoon! Who wouldn't get excited about that? Now you no longer have to fork out hundreds or possibly even thousands for an expensive programmer and wait weeks or even months to get your software to market... (assuming all the bugs have been detected and worked out) This software lets you get the same result but with your bank account still intact!... and your product ready to market in practically no time flat. Just fill in some blanks, put in a "recipe" and answer some questions... then with a few clicks of the mouse you're done. Your software is ready to roll... Simple test it out and then hit the market! With "Software Designer Pro" you can have your very own software application completed and ready to be taking orders on it all in the same day... and that's if you're slow! Instantly Create Profit-Pulling Software Applications For Practically ANY Market - No matter what your market is, you can now use "Software Designer Pro" to automatically create professional software, without spending thousands. You WILL have your first Software created in only a few minutes. - All it takes is a few short minutes to fill in the blanks, load a recipe, click the mouse a few times and your software will be complete. "Software Designer Pro" couldn't be easier to use. - This software is so simple to use. Even my 11 year old son was able to use it (now that's really saying something). Build your email list to gargantuan proportions by creating and GIVING AWAY viral software applications! - "Software Designer Pro" is the perfect tool to create lead-generating viral software tools. This strategy can be used in almost unlimited markets and you can even get a tax deduction by giving away "promotional" items.

Free recipes included! - I'll also give you a starter pack of recipes to help guide you as you fill in the information required! "Software Designer Pro" is perfect for anyone who wants to sell software but doesn't have the time and money to invest in developers and programmers. To hire a good professional software developer and programmer can cost anything up to \$200,000 per product! So I could easily be charging \$997 for this software, and you'd be getting a tremendous bargain... but I'm not going to be charging anywhere near this much. And here's the reason why: I've been in your position and I know how hard it is. The sole reason I created this software was so that I could help people like you to create professional software applications quickly and easily and without having to spend hundreds or thousands of dollars. This is not some cheap piece of software. In fact... version 1.0 (that's the current version) cost \$14,195 to develop and the upgraded version (currently being developed) could be priced at around \$1,000 once it is released. So to offer this software for \$997 would be denying the reason for me creating it in the first place. Okay, there it is My offer is ripe for the taking and now is YOUR best opportunity to get in. Take it lightly and risk missing out. Jump in with both feet and secure your marketing future. The choice is all yours. Listen... does it really matter what you think about software or about creating your own software? What matters is the market has spoken... and their voice screams loudly... WE WANT SOFTWARE! Could You Possibly Need ANY MORE Incentive To Buy? WAIT!... Now You Can Get FREE Lifetime Updates of Software Designer Pro When You Place Your Order TODAY! To really put the icing on the cake and make this an offer that you absolutely can't refuse I've decided to add this one incredible bonus. In fact, I'm not going to feed you some line of bull and tell you that you can only get the lifetime updates ONLY if you order before midnight tonight. To be honest, your biggest fear shouldn't be about what bonuses you might miss out on but about the jump your competition is getting on you every day that you DON'T have this weapon in your arsenal... LAST MINUTE BONUS: Free Lifetime Upgrades (\$\$\$Priceless\$\$\$) When You Order Software Designer Pro You'll Receive FREE Lifetime Upgrades! Here's just a few examples (ideas) of powerful software tools you could create when you order your copy of Software Designer Pro... Affiliate Link Cloakers - These nifty little tools help resellers protect their commissions. I just created two of these in less than ten minutes for my affiliates but I've used it myself for over six affiliate products I'm promoting. There are still plenty of people who will pay good money for software that helps them keep their hard earned commissions. Sales Letter Generators - An ever increasing number of online marketers are looking for solutions to high priced copywriting services. These

services are worth every penny but most people simply can't afford it. With a little research and a good swipe file you can create a template to load into the Software Designer Pro interface and pop out a killer sales letter generating software that rivals even the most experienced of competition. Russell Brunson recently created his version of this kind of software and brought in \$11,859 in 48 hours! That's the kind of power and profit creating and selling your own software can produce.

Name Squeeze Generator - If you have been around internet marketing for any time then you already know what a "name squeeze" page is... for those who don't know... a name squeeze page is simple a special page that is used specifically to build an opt-in list. There's really no limit to the uses for this type of software... you can sell it in practically ANY niche. The good news is that it's VERY easy to create. Just for kicks I created a name squeeze page generator in about 20 minutes and now I just use the software myself to kick out custom designed pages in less than 5 minutes.

Niche Market Mini Site Generator - Niche marketing is hot and it's not showing any signs of cooling off right now. There's incredible demand for products that help people create mini sites for their niche market. Add a way for people to make residual income from Google Adwords and Amazon and you could potentially have an incredibly hot-selling software. I've done a little research on this type of software and found products ranging from \$49.97 up to \$397 for an entire course on niche marketing mini sites.

Order Page Generator - Generates custom order pages based on proven techniques for getting the most out of your visitors. I created a version of this software called "Order Page Magic" and used it to generate almost 2000 leads and have made almost \$15,000.00 in back end profits simply by giving away the software. It took me about 30 minutes to generate the application (it was my first one) and it has proven to be a very versatile piece of software! Obviously, this is not your run of the mill offer. In fact I challenge you to find a better offer on the web seriously take your best shot. If you can find one that's better then my congratulations go out to you and your incredible marketing prowess. But if you're ready to get off your ass and take the marketing bull by the horns then you need to act fast real fast. See you at the top! Best wishes, **DIGITAL DELIVERY NO SHIPPING OR HANDLING FEE'S!**
