Last season we saw a huge explosion of bloggers coming online for the first time. Yes I know blogging
has been around in the days of hard coding through HTML, though they used to called it by another
name... Right this minute thousands of people just like you are realizing their dreams. They dont struggle
to pay their bills each month or worry about the rising cost of everything, and they dont sacrifice what they
want for what they can afford because they can afford everything they want! Imagine yourself in a new
car, dining in expensive restaurants whenever you want, buying expensive gifts for your friends and
family, taking luxury vacations and being treated with the respect you deserve. Its a great image, isnt it?
And its absolutely right in front of you! Imagine living the good life, every day, all the time, and having the
time to enjoy it all. Isnt it your turn to grab a large chunk of the money pie? Would you like to gain
financial freedom and personal success by building unlimited number of blogs and get them updated daily
automatically and completely hands free? Of course you do! Blog Your Way to Big Bucks. You really CAN
make a life-changing amount of money without even writing a single post automatically! Does this story
sound familiar? You purchase book after book on how to build a Blog, or how to pursue the interests you
are most passionate about, only to be left frustrated and broke. These books might give you the
beginnings of what you need to know, but they fail to follow through, leaving you hanging on, and missing
out, on the financial success you know is out there just waiting for you. They whet your appetite, but they
don't show you how to actually make money by automating your blogs. Well you're about to be delightfully
surprised! If you have tried blogging...you will agree that posting your own articles on your blogs every
single day may take the ****lights**** out of you... This happened to me too, because I had too many projects
too handle and I always wished how easy it would be to have a system run for me posting on my blogs
(not a single blog) every single day, making my site look fresh with resources and virtually feeding the

Search Engine Spiders. The biggest blow or revelation should I call it, came to me when one of my clients came to me and asked me why I have not update my site for months...and there I was with jars ajarred staring backat him thinking of a fast get away....in the first place I wasn't even sure that anyone will notice about the inconsistency of my blog posts...but they do! So I went a step further..looking for answers on how to automate my blogs and I have even tried software programs of up to hundreds of dollars to do this, in fact I have a Script that's costing me thousands of dollars and months of development that is ongoing right at this moment of writing..but the whole point is that I have found free resources to do just that....AUTOMATE MY BLOGS. So does you blog update itself automatically? Do you have one at all to start with?
