Take a look at this website : UsefulIdeas.BecauseIcan.eu It was setup using Auto Blog Feeder New "Set It And Forget It" Technology Automatically Drip Feeds Fresh New Content Into Your Blog For As Long As You Choose! How Would You Like To Build The Biggest Blog In Your Niche With 3 Simple Clicks Of Your Mouse, Just One Time? Do you dread creating content for your blog? Does blogging seem like more of a laborious chore than you ever imagined it would be? Would you like an easy way to fill up your blog with content on auto-pilot that you don't even have to write? Maybe you'd like a tool that could automate and post all of your content on a schedule that YOU choose! You're about to discover a very powerful and brand new breakthrough in blogging technology that can do just that! By making your way to this web page, I can accurately say that you've probably done at least a little blogging yourself or at the very minimum have been planning to start a blog. Blogging is an awesome way to generate traffic, subscribers and customers that you can follow up with for a lifetime of profit. A good blog creates tons of free traffic that you can send to any affiliate link, web site or sales page that you want. Many marketers are coming to the realization that a blog can actually be more effective than having an e-mail list! This is because of all of the cool "subscribe" and syndication features that are now available for a blog. The one thing that most of us realize is that creating content for a blog can be a whole lot of work which is why we use... Modified PLR, Outsourced & Borrowed Content... It's no secret that many blog owners use other people's content to create blogs jammed with info rich content. This has become somewhat of a necessity with the introduction of so many successful blogs hitting the market on a daily basis. Most of these big named blogs have guest authors that regularly contribute to the site so that the blog owner has to contribute very little, or no content at all! Having guest writers is a great idea but the harsh reality is that you can't find them unless you pay them a fortune or have an already highly trafficked and profitable blog they can plug into to get traffic to their sites. The solution for people like you and I is to use content that we get from alternate sources. These sources can be article sites or blog content sites that offer tons of content that

can be published under your name. I highly recommend NitroBloggerfor this. You can also use articles from article directories and publish them with the authors name as a kind of "non-exclusive" guest appearance. The best one which is a great place to share for anyone is eZineArticles.com These options provide you with tons of content and if done "right" can actually provide you with a lifetime of content you don't have to write. If you do nothing but use the information I just shared with you on your own blog, you will be in the clear for creating content for a long time. But there is something you may NOT be aware of yet... "Using Borrowed Content Still Takes Tons Of Time & Effort!" Using the tricks I just shared with you for getting tons of content are awesome ideas that can literally solve your content problems forever. Unfortunately, there are some underlying problems that you may not be aware of that pop up once you start using the types of content I just mentioned. One is that it still takes a ton of time to get an article, login to Word Press, paste in the title and the body, select a category, select a publishing time, etc. All of these little things added up and multiplied by hundreds of articles or blog posts ends up being dozens, upon dozens of hours and if you have more than one blog, you could be talking in the hundreds of hours or more! Most people just starting a blog don't realize this until they start working on their blogs and then realize that they are still required to do a lot of work to get those blog posts up. Worst of all, you have to do this all the time to keep your blog up to date and keep your blog fresh with the search engines. So what can you do to solve that problem? Well, unfortunately, there is no "process" that will help make this work go away for you but all hope isn't lost! What if I told you that there was a solution that eliminated ALL of the tasks above that I just mentioned? What if I further told you that this solution also posted the content to your blog automatically for years (if that's what you want) while you sleep, hang out or vacation? Would you be interested? Most people would be which is why I'm so excited to announce the release of... Auto Blog Feeder - The Ultimate Blog Automator!
