Once and for all, everything you wanted to know, revealed! Reach Search Engine Stardom, Virtually Overnight! Exclusive Offer! Never Before Revealed Information! Saturday, May 30, 2009 Dear Friend, How long have you been cracking away at this whole Internet Marketing thing? More people don't make it than do make it in this "game". It's nothing personal and I can definitely tell you it's not due to a lack of hard work or effort. Chances are you've actually worked so hard that you're doing more harm than good. You may have made a few bucks, but as we all know you've probably spent a lot more than you've made. Memberships, Content, Tools, Software, Gimmicks, Advertising, etc... It all adds up pretty quick. At the end of the day the person on the other end of the Internet is the one making all the money and you can't believe how much you've spent. When the Internet came out, anyone could put a site up on anything with little effort, money and skills and they could very easily make a fortune. They had the eyes of millions of people staring at just them. In the last few years however the Internet has been growing at such a rapid pace, it is now next to impossible for people to find you on the Search Engines unless you really know what you are doing. You're not going to be able to do a thing with Search Engines unless you have a little information to get you started and learn a few tricks of the trade. Until now this sort of stuff came at a very high price because the reward would be a huge income stream all from the Search Engines, particularly Google. But Wait, There Is Hope, Just Keep Reading ! Just as you've heard over and over again how much other people are going to help you succeed with online marketing, you have no doubt grown to not believe a word anyone says. One thing you should understand by now is that there are people making money on the Internet. There are a lot of people making a lot of money. Those \$20,000 - \$100,000 month earnings aren't out of this world, they aren't a figment of some copywriters imagination. Your sites look just the same as the big guys sites. You work just as hard and long as they do, sometimes a lot more and harder but again, you're still spinning your wheels and going no where. It can be a real pain if your putting something out there and the people that want it will never get a chance to see it. Not so much see it as find it. There is a big difference between showing people something and selling people something. Guess what? People are actively looking for what you're promoting. In fact, millions of people are looking for

what you have to offer right at this moment. Google is directing all these people to other peoples sites. I am not going to show you how to create a PPC ad campaign that is going to cost you an arm and a leg. Instead I am going to show you how to not only get into the top listings on Google, but I'm also teaching you how to maintain that listing in Google you have and keep getting more and more traffic at the same time. I'm Not Re-Inventing The Wheel, I Am Explaining How To Dominate Google! What really makes me mad is all these "Guru's" out there promising the world to everyone and way under delivering. For the most part all of these Guru's are only Guru's because they say they are. If they really knew how to pull a fortune of off Google and the other search engines, you wouldn't be finding out about them through a mailing list that millions of people can send an e-mail to. When I teach someone how to do something it is from my own experience and my own trial and error. I don't simply give you some filler information and save the best stuff for myself. You'll know every about Indexing and Link building as they are the fundamental elements of making money online with search engines.
