

# Atomic Ftp Client: (file Transfer Protocol) -

[DOWNLOAD HERE](#)

FTP (File Transfer Protocol) is the most commonly used method of sending and retrieving files to and from other computers over the Internet. All you need to manage and transfer files is the use of a computer which has a direct connection to the Internet. Just enter the name (or numeric address) of the server you want to transfer your files to or from, add your personal username and password, and press connect! With a simple FTP program like AtomicFTP, you'll have a live connection with a remote computer in a flash!
