Introducing Easy Banner Maker Pro - a highly customizable template based system, where you get master templates and copy and paste elements. And when you combine these 2, you get virtually an unlimited number of different banners you can create, in all of the most popular sizes. What makes this special is the ease of use, and the quality of the final banners ANYONE can create, with no design experience. The way it works is, you pretty much get all of the elements that make up a professional banner design, all pre-formatted for you and ready to go. And all you have to do is put all of these elements together, in your own ways, by copying and pasting them. Its like a paint by numbers system, or a building blocks system. Very easy and powerful stuff.
