

Forex Mt4 Trade Copy Tool Fx Ea Trade Copier

[DOWNLOAD HERE](#)

This software allows you to copy trades from one MT4 (master) account into one or more other MT4 (slave) accounts. The trades are executed within 1 second from the master into the slave account(s) and include the exact values (stop loss, take profit, etc.) The trade in the slave account is then modified as the master trade is modified and closed within 1 second of master trade closing. This software supports the mt4 trading platform only. This software works along with other eas and will execute manual trade signals as well as EA trade signals. Works great if your worried about broker manipulation of your ea's and want to copy trades from your demo account into your live account(s). Works with any mt4 broker. Tags: mt4
