These videos are created with a simple and straightforward approach so you can learn the exact steps you can take to take action and get your forum up and running the same day!

1. Finding A Niche Topic For Your Forum and Planning Ahead The success of your forum points to the planning in your beginning stages for that good niche topic. This will get your forum indexed by the search engines in that niche and will attract your main audience. There are several questions that you'll want to ask yourself to figure out whether there is a market out there. We'll look at these specific questions so you can find your niche forum topic and start brainstorming how your forum will produce revenue and build a community.
2. Selecting a Forum and Finding Web Hosting There are many free forum out there, some that have been around for over 9 years. But which ones should you choose? You'll be given an overview of the many free forums as well as forums that cost some money. Did you also know that large forums tend to take up a good amount of server resources? Even so, that is no excuse to not create one. You'll learn how to find web hosting that is not only cheap, but that will fit your needs.
3. How to setup phpBB using cPanel and changing the style While a number of forum will be available to you, in this video you will learn specifically how to install phpBB, which is a highly recommended forum with over 9 years of serving forum owners. To create your uniqueness from other forums, you need to have a good look. In order to have a unique look, you need to customize your phpBB forum style. But how do you do this? It's really not that hard and you'll learn just that in this video series.
4. phpBB Forum Features and How to Use Them It wouldn't be good just to show you how to install a forum w/o showing you how to use it right? Once you have setup your forum, you'll need to access your administrative control panel, which will give you full access to edit and change your forum. We'll go through the different

options that phpBB offers so you can understand how to use it and customized the settings for your own liking. 5. Building Your Community Content: Content Content Content We all know when you initially build your community you need interaction. But to even get to that point, there are several things you need to do, such as publish some basic content in your threads. It's been known that people usually don't respond to empty threads, but respond to content or posts that are already there. You'll learn how to plan your categories and forums so that you don't overwhelm yourself. You'll also learn how to motivate your members, which keeps the interaction moving. 6. Marketing Your Forum to Build a Community Now that you've created your forum and you're ready to go, let's start marketing! One thing to make a note of, is before you even think about marketing your community, you should have at least some interaction going on; otherwise people will come and just leave. That's one of the many tips you'll learn in this video series. It's often easy to go all out and try all types of marketing methods, but the secret is to start small. Go to places where people are already interacting in your niche and build from there.
