How A Little Known U.S. Government Law Will Provide You With Thousands Of Pages Relevant Niche Content That Won't Get You Banned From Search Engines. I Just Took Advantage Of This Law And In Less Than Five Minutes I Created A 362 Page Website With My AdSense Codes And An Opt-In Email Form On Each Page! See The Site I Created By Clicking Here! findhotniches.com/qpg/naturalcures Dear Friend, Let's get straight to the point. If you're, new to marketing online, or even if you're a seasoned expert you know that building traffic to your website is no easy task. You probably already know that search engines are the best free way to get more targeted visitors to your website. But... Getting Maximum Search Engine Traffic Depends Greatly On How Many Times You Can Replicate Yourself Throughout The Internet. This means your website you needs to have several pages of relevant content. And the more original your content is the better your site will do because the largest search engine in the world, Google, is the source of over 70% of all search engine traffic and originality is one of the factors they use when considering how high your site will rank. That means grabbing a few articles from some ezine article directory just won't be as effective as it used to be because your just duplicating content that is more than likely already available from possibly hundreds of other websites. So you only have a few more choices... 1. You could write the content your self. Sure you can probably add a few pages you your site every month but in order to get lots and lots of traffic you would have to write hundreds and in some cases thousands of pages which will eat away at your precious time... NOT RECOMMENDED! 2. You could hire a ghost writer to create original content for you but a quality ghost writer who delivers fast will more than likely cost you \$50-\$100 for 20 pages of content or less. NOT RECOMMENDED! 3. You could use some page generation software that creates content from search engine results or some other method and risk getting your website BANNED from the search engines. NOT RECOMMENDED! So is there a better solution to easily generate traffic without wasting too much of your precious time or hard earned money? Well... There Are Literally Millions Of Keyword Rich Pages Of Niche Content That You Can Legally Steal As Written Under U.S. Laws! These content rich pages are available for anyone to use

for any reason, including commercial gain which is clearly outlined under the Public Domain policies of the United States copyright laws. This Public Domain policy states that... 1. You can legally reproduce and use any, book, manuscript, transcript, film, art work, or recording published before 1923. 2. And what's more is that any thing that was published between 1923 and 1963 where the copyrights where not renewed also falls into the Public Domain. It has been estimated that less than 93 of these works were NEVER renewed. That Means You Can Rightfully Copy Each And Every Word From A Public Domain Book Or Document And Turn It Into 1000's Of Pages Of REAL Content For Your Website. And It's A Lot Easier Than You Think... 1. Find a public domain book relevant to the market you want to target. I'll show you how to find public domain books in over 16,000 U.S. Public Libraries right from your desk top. If your local library doesn't have a copy of the book you want I'll show you how you can get books shipped to your local library so that you can use them. 2. Simply scan the book using OCR (Optical Character Recognition) software. OCR software will scan the pages of the book and instead of tuning them into images it will turn them into actual text that you turn into a .txt file or copy and past into MicroSoft Word. If you don't have a scanner or OCR software I'll show you how you can still get your books scanned and turned into text. 3. Now you've got a huge text file but how do you turn it into hundreds of optimized traffic sucking web pages? Introducing... Works In Under 5 Minutes!... This Software Will Turn Your Public Domain Text Files Into Hundreds Of Highly Optimized Organized Web Pages, With Your AdSense Codes, Opt-In Email Forms, And Just About Anything You Can Put Into A regular HTML file.. Just Create Two Template Pages. You'll Need To Create An HTML Template For Your Index Page And Another HTML Template For Your Content Pages By Using A Few Special Tags That You Can Copy From The Software. Locate the text file that you want to use as your content pages and set the words per page. Set Your Title, META Keywords, and META Description Tags. Set The Text Links That Will Connect Your Pages Together. You Can Use Any Text For The Previous Page, Next Page, and Index Page. Load The Location Of Your Index And Page Templates. Set The Location Where You Would Like To Save Your Newly Generated Index Page And Your Content Pages And Set The File Names For Your Content Pages. Then Click The Generate Button.... But Will This Software Get You A #1 Listing In The Search Engines? While I can't make the bold claim that this software will get you a number one listing in the search engines over night I can tell you this... Your Sites Won't Get Banned From The Search Engines Using This Software Unless You Do Something Stupid. Originality counts in the search engines and most

of your content pages will be "considered " to be very original because there are tens of thousands of works in the public domain and even if some one else is targeting the same niche that you are there's about a one-in-a-million chance that they will use the same public domain book that you do. The truth is 99 of webmasters won't ever even know about this content creation method in the first place. Also this isn't some "slight of hand" trickery that uses search engine listings as content. That type of content can get your websites kicked out of search engines for ever. Why risk it.... Just create REAL relevant content pages with out all the worries so you can....
