Awesome Link Effects How many times have your visitors got lost on your site when trying to view videos or images and they forgot where they came from? How many times have you had to give up the URL of one of your secret sites because it shows in the web browser address bar? How many times have you fumbled around putting together pop up windows or the like to keep your visitors on your site? Well those days are over. Now you can have pages open over the top of your website without fear of losing visitors. Let me give you an example: Click HERE for the old way. Click HERE for the ALE way. Now which one was more likely to keep visitors on YOUR site?. Thats not the only option available, try this effect Do you have a set of webpages such as instructions or a set of videos to follow?. Why not have them all viewable in order with 1 link, LIKE THIS Maybe you have a set of images you want to show LIKE THIS All these effects and more (a total of 6 in all) can be easily created with ALE. ALE is a script that runs on a php server that gives you a set of forms, you fill in the details for the effect you want, press a button, and up pops the html code you paste into your webpage for the link.
