"How Would You Like To Sound Just Like A Professional News Anchor The Next Time You Create Your Own Podcast Without Having To Have The Budget Of A TV Network?" If you are creating audio podcasts for your professional web site, you don't want to sound umm like uhhh a dork that can't remember what the heck umm they are trying to uhhh say! Do it like a real PRO with "Podcast Assistant In A Box" starting today! Your Name Here Dear Friend, Podcasts are a pretty incredible new technology, aren't they? If you're like me, you've probably thought about doing some Podcasting of your own. Maybe you've taken the first step and done a recording. I did that, too, and I was really stoked about it until I played it back. It went something like this: Uh yeah this is Liz. Liz Tomey. I'm gonna review this CD from no, wait, it's a DVD. OK, I'm reviewing the latest, uh, DVD from Coldplay Oh, THAT was impressive. Yeah, right. Like I'd want to send that out over a podcast to my customers, with all the ums and ahs. No way, Jose. But then I got an idea Suppose you could use a simple tool to edit out all the ums and ahs and do-overs. Imagine you do your podcast, talking just like you normally do without having to be self-conscious or think about what to say. Then you use a simple tool to smooth it all out so it sounds like a pro recorded it. Sounds too good to be true? Well, it isn't if you have the right tool. Think about it. The ability to edit and delete could make you into a Podcast or Vblog star overnight. But Cleaning Up Recordings Is The Hard Part You could pay a sound engineer to clean up your Podcast, but it would cost you a lot of money those guys make at least \$50 an hour. But instead of paying some sound engineer a fortune OR trying to read from a script (which sounds fake anyway), what if you had Podcast Assistant In A Box Finally!
