"Stop! Spam Filters Are Making A Huge Impact On Email, And It Has A Bad Effect On You And Your Email List You've Worked So Hard To Compile...The EMAIL Format Pro Email Marketing System Can FINALLY Get Your Email Through!" Discover How You Can Get White-Listed, and Get Your Email Past The SPAM Filters! Now You Can Stop Worrying About SPAM Filters, and Start Reaching Your Prospects... Take A Look At The Facts: * The top ISPs blocked 22 percent of permission-based e-mail in 2004, according to a study by e-mail services provider Return Path. * Jupiter Research reports that marketing messages erroneously blocked as spam cost marketers \$230 million in 2003. That figure will balloon by \$419 million in 2008. * Worldwide, spam is expected to cost businesses \$30 billion this year, and \$113 billion by 2007 (source: Radicati Group). * Over 70 of technology professionals believe the spam problem has reached epidemic proportions (source: TrendMicro). How much time and effort do you put into your online business, and how much of that time is spent trying to stay up to date with your email marketing efforts? As you already know, email marketing is one of the most lucrative avenues you can use to really pump up the money that you make each and every month from your online business efforts. But.. Are Your Emails Getting Through To Your Prospects? On January 1, 2004, the CAN-SPAM Act, went into effect in the US. ISP's (Internet service providers), hosting companies, and email hosting services have taken every means available to stop SPAM from entering into their paying customers inboxes. This turns out to be both good and bad... First, it's good in that you and I do not have to work so hard at getting rid of all of the JUNK in our email inboxes, although these filters have helped, they have not helped as much as everyone thought they might. Secondly, it's bad because now you and I have to figure out just how we can get our emails through to our opt-in prospects and subscribers, because these filters have inadvertently started hitting "legitimate" email marketers email as well. In fact, I just sent an email to a friend a couple of days ago, and he never received it because his ISP's SPAM filters tagged it as SPAM, and trashed it! This was as legitimate of an email as you can get between two friends, and if this is happening between friends, what do you think these filters are doing to your business emails? So I decided That It Was Time To Come Up With A Solution To This Problem, And It Was Time To Start

Getting Your Emails Through.. It isn't a complicated thing to do. In fact, everyone can do this if they want to put in the time and effort. This product comes with full master resale rights.
