"Float-In Window Generator" Automatically Create Unblockable Float-In Windows By Just Pushing A Button to Instantly Insert Your own "Float-IN Windows" Into The HTML code of Any of your Web Pages In Less Than Two Minutes. You'll never have to write a single line of code!

Float-In Windows Stay In View Even If The Visitor Scrolls Down The Page. Use Any HTML, Images, Text or Anything Else You Would Put Inside An Old Style Pop-Up! Now, if you are wondering... "What exactly is a 'Float-In Window' and why can't it be blocked like the old style pop-up windows?"... Well first let me explain how pop-ups work and how they are easily blocked. A Pop-Up window works by instantly opening a completely separate "new browser window" that pops into view whenever someone enters or exits you website. Pop-Up Blockers work by automatically stopping any and all webpages that are programmed to open in a separate "new browser window". Thus when a visitor running any kind of pop-up blocking software lands on your page the pop-up window is blocked automatically and your advertisement- is never seen. Next, lets examine the attention grabbing power of "Float-In Windows" and why they cannot be blocked, killed or destroyed. "Float-In Windows" are simply a part of your web page and Dont require a new browser window to be opened. Although they appear to be a seperate window they are actually a part of the same web page that they gracefully Float-In to. "Float-In Windows" Dont require a New Browser Window to be opened therefore they CANNOT be blocked, killed, or destroyed. ----- SIDE NOTE:----- Float In Windows Stay In View Even If The Visitor Scrolls Down The Page. Plus Float-In Windows Aren't Annoying Because You Determine How Often Your Messages Appear... (Ill explain more on this later.) ----- "Float-In Windows" will Grab your prospects attention, collect more emails and boost your profits the way pop-ups no longer can! Here's All You Have To Do... Set The Look , Size, and Speed Of Your Float In Window. Set How Often Your Float-In Windows Appear to Each Visitor, Once Every Hour Up to Once Per day. Type or Copy & Paste Your HTML Directly Into The Generator. Preview Your "Float-In" inside a Demo Window. You may Go Back And Tweak The Settings As many Time As Necessary Until Your Ads Float In Just The Way You Want. Press A Button to Auto-Insert Float-In Windows Into Any Html Document. Save Your Float-In Windows And All Your Perfected Settings For Future Use. Plus... All The Float-In Window Code Is Extremely Search-Engine Friendly. Other similar software install some or all of the script into in the header section near the top of your html, which can cripple your search engine ranking position. You see major search engines such as "Google" rank websites by weighing heavily on the keywords and phrases at the beginning of your HTML code. "Float In Windows Generator" will insert all the code at the very bottom of your HTML code so it won't do any harm to your search engine listings. Plus... You are in precise control of which direction your Float In Windows glide in from, when they appear, how often they appear, how fast they float in and

exactly where they land! Your Ads Float In Smoothly From Any Direction You Choose (Top, Right, Left Or Bottom). You Can Set Your Float-Ins to Appear Instantly, Or Delay Them (In Seconds) to Appear At Any Time You Choose.
