Heres How To Create Unlimited Personalized Toolbars For FREE That Automatically Promote Your Websites & Affiliate Links For You 24-7! AND - If You Order Today You Also Get Full Resale Rights To This Product And Website So You Can Sell It Yourself And Keep Every Single Dollar In PROFIT You Make! Hi, Im Louis Allport, Let me ask you ... \* Would you like to be able to reach thousands of people online instantly with your message? \* Would you like access to one of the most powerful (and little used) ways to promote any affiliate program online ... for free? \* Would you like a link to your website to be in front of your past visitors whenever theyre surfing the net so that they return to your site again and again? What Im talking about is getting your own personalized toolbar. Lets take the example of Google... The Google Toolbar is on millions of computers worldwide (including mine). Here are just three ways they benefit: Now, you may not be able to get millions of people worldwide to download your toolbar, but if you get your own toolbar on dozens, hundreds, even thousands of computers of people who visit your website, you benefit GREATLY. Google clearly know what theyre doing when it comes to marketing online. If they have their own toolbar, why dont you - especially when you can get one for free? Heres the scoop... The way Im going to show you to create toolbars is very different from other ways you may have seen - for two very important reasons: Reason 1 = You will NOT have to buy any expensive software at all. (Ive seen toolbar creation software selling for over \$1,000!) Ill show you how to get your own personalized and professional toolbar made for FREE. Reason 2 = Unlike toolbar software that creates static toolbars which cant be updated - Ill show you how you can create toolbars that you can update as many times as you want, and every time you do an update (it takes just a minute) the toolbar will update on the computer of EVERYONE whos installed it! Can you see how powerful this is? You can instantly reach every one whos installed your toolbar with a brand new message whenever you want! How To Create Unlimited Money-Making Toolbars For FREE Interested in making as many professional quality, instantly updateable, money-making toolbars for free as you want? Well - this information is not common knowledge. It took me many weeks of research to fully get to grips with this subject. However, Im going to make it very easy for you ... Ive taken those weeks of research and turned them into twenty-five in depth

yet very easy to follow coaching videos you can view directly on your computer. I've bundled these twenty-five videos (they come to 207 minutes in total) into a single coaching product for you: Here's a rundown of what each in depth video shows you and how you can quickly start benefiting with your own unique toolbars. Pay particular attention to the examples I've included - you can have any text you want for your toolbars, these examples are just to give you a good idea of what you can quickly and easily create by following the videos in this product:

**Video One (9 Minutes)** In this video I'll talk you through a wide range of popular toolbars you can install and how to use them for your own ideas and research purposes.

**Video Two (9 Minutes)** Here I'll talk you through how you can get great ideas for your own toolbars from Google and eBay.

**Video Three (10 Minutes)** In this video I'll talk you through how the Ask, Dogpile and Alexa toolbars can give you a huge amount of ideas.

**Video Four (6 Minutes)** Here I'll show you how you (and your users) will be able to quickly, easily and effortlessly install and uninstall your toolbar.

**Video Five (7 Minutes)** In this video you'll discover how it takes just one minute to instantly update your toolbar on every single computer it's installed on!

**Video Six (2 Minutes)** Here I'll show you how to create a blank text file to get your toolbar creation process rolling ...

**Video Seven (8 Minutes)** In this video I'll talk you through the easy way to structure your toolbar code. Even if you're not technical at all, you'll find it quick and easy.

**Video Eight (16 Minutes)** Here I'll show you how to start adding your own unique text to a toolbar. You can also add graphics if you like. Here is one quick example:

**Video Nine (17 Minutes)** In this video I'll show you how to add buttons to your toolbar which can contain both graphics and text. You'll also discover how to create a button that when clicked redirects the user to a web address of your choosing. Here's an example button that would open Google in a new browser window:

**Video Ten (5 Minutes)** Here I'll show you how to add uninstall functionality to your toolbar. Even though you want your users to keep your toolbar installed for good, it's important you give them the choice. Here's an example of an uninstall button:

**Video Eleven (6 Minutes)** In this video I'll talk you through how to add the powerful Zoom In and Zoom Out features to your toolbar. Here's a quick example of both the Zoom In and Zoom Out buttons:

**Video Twelve (18 Minutes)** Here I'll show you how to add search functionality to your toolbar. You can set your toolbar up with as many search engines as you like to give your users tons of choice. You can even profit from this feature by sending your users to pay-per-click search engines where you get a percentage of each click. This is an advanced, powerful and profitable feature. I'll show you how to add this step by step. Here is just one example of how it can be added to your toolbar:

**Video Thirteen (5**

Minutes) In this video I'll show you how to add a drop-list menu to your toolbar if you would like. This way, rather than your users typing in what they're searching for, they simply choose it from a list. Here's a simple example of how it could look: Video Fourteen (10 Minutes) Here I'll show you how to add highlight text functionality to your toolbar. This is a very useful feature that allows your users to easily find (highlight) any text on the page that they want to. Here's an example of how this feature could look on your toolbar: Video Fifteen (6 Minutes) In this video I'll show you how to add Clear Search History functionality to your toolbar. With this feature, your users can clear the previous searches that they've done through the toolbar. Here's an example of how it could potentially look on your toolbar: Video Sixteen (9 Minutes) Here I'll show you how to add the Clear Cookies functionality to your toolbar. Depending what kind of toolbar you're looking to create, you might find this a useful and powerful feature to add to your toolbar. Here's one example of how it could look: Video Seventeen (6 Minutes) In this video I'll show you how to add the Clear Internet Explorer - Temporary Files feature to your toolbar. You can use whatever text you like with this feature - here's just one example of how it could look on your toolbar: Video Eighteen (16 Minutes) Here I'll talk to you step-by-step how to add a powerful and flexible popup blocker to your toolbar. It can be turned on and off by the user, and it can even update automatically so that it shows how many popups have been blocked so far. Here's an example of how it could look: Video Nineteen (2 Minutes) In this short video I'll show you how to add separators to your toolbar. Here's an example of a separator added between two buttons: Video Twenty (5 Minutes) Here I'll talk to you through the important difference between Single and Split style menus for your toolbar. These two types of menus have different purposes, and you can choose at any time which is best for what you want from the toolbar. Here's an example of a Single style menu: And here is an example of a Split style menu: Video Twenty-One (7 Minutes) In this video I'll show you how to choose between a Split and Single style menu when you're creating your toolbar code. It's dead easy. Video Twenty-Two (8 Minutes) Here I'll show you how to add as many unique menu items as you like to your menus. Video Twenty-Three (7 Minutes) In this video I'll show you how to add as many extra menus and even sub-menus to your toolbar as you want. Sub-menus allow you to fit even more features and functionality onto your toolbar. Here's one example of how a sub-menu could look: Video Twenty-Four (7 Minutes) Here I'll talk to you through in more detail the structure of these toolbar menus and how to quickly set up as many as you would like. Video Twenty-Five (6 Minutes) In this video I'll show you how you can use menus to run commands like

highlighting text, uninstalling the toolbar ... this will make your menus and toolbar even more powerful and flexible.
