By now I guess you are wondering: "Is this software really going to work?" Well we would like to offer you the chance to try it out, risk-free for 30 days. We could easily sell the software for $197, and it would be worth every penny at that price. And we may even raise it to that price in the near future. However we understand that not every webmaster has a huge budget to spend on software to help promote their websites. So for now, we have priced The Directory Submitter at a one-time price of only $67 so order now before we change our minds and increase the price to $197 Let's recap on what you can expect from the Link Directory Submitter: You'll increase your site popularity in record time. You'll receive more traffic by gaining a higher position in search engines, such as Google, Yahoo! and MSN. You'll stop wasting time manually submitting to link directories. You won't have to search for themed websites. We now have more then 2700+ quality directories already included. You will greatly reduce your reciprocal links from your website because more then half the directories included in the software require NO back links to them. You'll cut down the number of directory rejections. You don't have to upload anything to your website. Everything is done from your desktop! You can submit ALL of your sites by using multiple profiles. The software is so easy, my 10-year-old niece whizzed through it in a matter of minutes! Each link directory in the submitter shows the directory's current Google PR. You get FREE lifetime updates to any new versions we release. You get fresh link directories to submit to by simply clicking the Update Directory Button from within the software, Each month we add between 50-100+ new directories into the submitter. The Link Title, Site Description and Keywords are rotated with each submission to a directory. This is to make each submission look as unique as possible from each other, and also to help get your website listed in search engines under many different keywords and link titles. Import and Export website profiles is now also included Users can now assign a custom color to each directory in the submitter, this is useful if the user wishes to use a color coding system to keep track of submissions or anything else. A submission history report feature has been added to allow the user to export and email a submission history report to their clients or for their personal records. New Feature v2.4: You can now add your own link directories into the submitter or bulk import directories from .txt files or excel exported .csv file New
