Q: What type of file are contained in the header template package? A: The 300 Professional Biz Header Templates package contains: 300 Adobe Photoshop files (.PSD) and 300 no-text .JPEG files.

Q: Are the header templates in the package only for use in Adobe Photoshop? A: No, the header templates can be used in other software that recognize .PSD files. The .JPEG files can be edited in any graphics editing software that recognize this type of file.

Q: Is it difficult to edit the header template in Adobe Photoshop? A: No, it's actually very simple. The header templates already have text on them and all you have to do is replace that text with your own. Just place the text tool on the text layer you want to edit, erase the text and then add your own text.

Q: I'm only interested in the no-text .JPEG files. What software do you recommend I use to edit them? A: As there are literally hundreds of graphic editors that recognize .JPEG files, I cannot say which one may be right for you and your needs. All of them have their strong and weak points. But what I can do is give you a list of graphic editors that you can get absolutely 100 for free which will help you easily edit your no-text .JPEG files. You receive this list upon purchase of the header package.

Q: Why do all the header samples have the website name Phototricity on them? A: Phototricity is a photo site owned and operated by Michael Wysmierski, the designer of the header templates in this package, and Gustavo Ishikawa, also a header template designer. The photos of the models on the header templates in the package are from the Phototricity website.
