Php Online Classifieds Script

[DOWNLOAD HERE](#)

This classifieds script is an easy way to set up a classified ads website; it is designed in such a way that it is extremely easy to change the look and feel of your website. You can design your pages around the functionality of the application. Although this script does give you a lot of control over the look and feel of the site, it lacks an interface for advanced administration features. However all the administration can be done through an interface such as phpMyAdmin. If you know how to use phpMyAdmin or a similar application and are familiar with relational databases, it should be really easy to administer categories and users, etc. Comes with MASTER Resale Rights!
