

Site Search Pro Script

[DOWNLOAD HERE](#)

SITE SEARCH PRO MYSQL BACKEND SITE SEARCH ENGINE based searchability to your entire website or parts of your website. Intelligent spidering does all the work. HTML is opened, parsed, metaterms extracted, titles extracted, and all html is converted into raw text. You can alter search output results by awarding point scales to matches by keyword, title, metatags, metakeywords, etc. MYSQL based so even the largest sites wont crash even with hi search load. Features
