Get Ready to Dominate Your Niche with the Article Domination Method Anatomy Of A Successful Article

Every article contains three primary elements; the Title, the Article Content and the Resource Box (aka Bio Box). We'll cover the basics now, and go into greater detail before we're done. Title: The Title clearly states the BENEFITS the reader will enjoy if they read the article in this case, the ability to easily understand Search Engine Optimization. It also contains well-selected Keywords. (more on this is a bit)

Article Content: The Article Content, also called the body text, is both useful and entertaining to read. Please note: The content is written in a manner that is likely to be enjoyed by the reader and does not read like a sales letter. Resource Box: The Resource Box is the area where you get to sell yourself and entice the reader to click the link you've supplied to get more information. As in this resource box, it's important you give the reader the opportunity to learn more through the link(s) you provide. What's Next? Once you've got your page properly optimized for your chosen keywords, it's time to get to the hard part: getting in-bound links to your site. 67 Pages
