Start Your Own Groupon Daily Deals Website! One of The Best Available! Plays Videos! Its got it All!!
See Demo at: flipndealz.com/ Its got it all and then some!! Premium Groupon script high quality version covers all the daily deal functions with features. The Groupon script lets the customer to choose his deals or products easily. Additional features like coupons with starting and ending time and date, options for multiple gateways. It can also be linked to social networking sites like Twitter and Facebook. The site also allows you to create multiple administration accounts. How the Groupon sites earns money Groupons goal is clear: help introduce people to small business. Here people can sell products and can earn money from this groupon or he can purchase product in minimum price. Each coupon on the site has a predetermined minimum. Groupon makes money by getting a cut of these promotions from the retailers. Groupon stands to make a significant amount of money because there is at least one Groupon deal every day. FEATURES Mobile/PDA version of the site; just add m. prefix in domain Youtube Video Ability to define multiple cities/platforms, so the user can switch between the cities with active deals count next to city names. Ability to have city in subdomain or as directory Generation of the coupon for successful bids (on email and in your account if you set it up). Coupon will have Auto-Generated HTML email, included:
a. Logo, text of deal
b. Valid time to use coupon
c. Unique code
d. Barcode (especially with default QR Code support)
Ability to set maximum number of units that can be sold upon one deal. If the limit is reached before the deal runs out, the deal closes and no one can buy it anymore. Every coupon should have a start date when the offer is opened to the public and an end date, when the deal closes (incl. time). If a deal is on (falls in between start and end date, and has not reached its maximum buyers), it is promoted to the main page of the city/platform in its specific category Site needs to have the ability to create an HTML email, which is sent to all buyers of a coupon, that includes the full name of the buyer. The email will be used to print it out and show to the shop owner to get the discount. Site allows to save all buyer info into a CSV file for both admin and company. Auto-Generated Email with stylized graphics-included coupon upon purchase completion. Translation of front end with multilingual support City specific language support (say, for Moscow, it can be in Russian and for California, it can be in

English) Sharing on Facebook, Twitter and email Mailing system (Daily Deal mail to Subscribers for each city) Referral system (allow user to invite friends and get a reward when invited friends buy a deal) Inside user profile, Users can deposit money on his/her account Users and companies can have his/her deposit and can ask for withdraw to the admin.
