This is where using safelists can help you out.... Send your message or ads to thousands daily! Post to safelists using your web browser only Join free safelists if you are on a limited budget Join paid safelists as your budget grows Never loose your ISP connection Never get accused of sending out spam ....now you can start promoting your, website or product or affiliate program no matter what your marketing budget is... Latest Version Is V2.0 Now Linked Directly To Our Large Growing Online Database Of Safelists Fully Searchable Database Search By A Safelist Name or URL Search By A Price Category Search By A Date A Safelist Was Added To Our Database Comes With Full Resale Rights Plus A Free CGI Safelist Script What is a Safelist anyway ? A Safe list is a list of email addresses of people who join and agree to receive emails from other members and to send emails to other members. Messages sent to a safe list are NOT considered SPAM because the members on the safe list agree to receive emails from the other members on the safe list What does Web Based Mailer mean and why are they so important ? Web based mailer means that the safelist that you join hosts the safelist on their own servers and you do not need to download any other software or lists of email addresses in order to send your messages or ads to the members of that safelist. It is also good to only use safelists that are web based mailers as the messages or ads you send out to other members of that safelist are not going through your ISP so you will not loose your internet connection because you have been accused of spamming people. See in order for a member of a safelist to get your messages or ads they need to personally join the safelist just like you would need to do if you wish to send your messages or ads out to the members of a safelist. So it is 100 SPAM FREE But how do I find all these Free or Paid safelists without wasting hours of my valuable time ? Easy just purchase a copy of The Safelist Directory eBook v2.0 and you will now have direct access to our large growing online database of free and paid web based safelists which you can start joining right
