Php Video Script

[DOWNLOAD HERE](#)

With Bits Video Script you can have your own video site working in just minutes. To add videos just search 1 of the 10 video providers inside the administration. You can use the script to manage an humor or any other kind of entertainment video site. The advantage of choosing yourself the videos and not doing it automatically is that you can control the quality of the videos on your site, and with the system we have developed adding videos to the site is really a breeze. Script Features - Get videos with just 1 click from 9 different NON adult websites and 7 adult websites. - You can get videos from: * YouTube * MetaCafe * LiveVideo * DailyMotion * MegaVideo * Revver * Photobucket * Spike * Vimeo Adult: RedTube HaPorn BoysFood Porn8 Megarotic Xtube Hard Sex Tube - Auto Update. - SEO friendly urls. - Manage Categories of videos on the site. - Manage traffic trades with other sites. - Traffic send to any of your content pages counts too. - Tops traffic senders are automatically ordered in the site pages. - Add links to content in other websites. (plugs) - Very customizable Template System. This Script is a Cash Generator!!!! Script Requirements are * PHP 4 or 5 * 1 mysql database * Curl * safe_mode must be set to off * open_basedir set to "" Most hosts have this configurations. If you current host doesn't, it'll be easy to find one that does.
