Get The Search Engines To Label Your Website An "Authority" In Your Niche Learn What It Takes To Gain Top SEO Rankings And Be Labeled As An "Authority Site" By Major Search Engines, Without Big Investments & Without Being A Computer Nerd! Does It Seem Like Creating A High Traffic Site Is Only Possible For The "Big Guru's"? Have you tried creating a website once or maybe even more than once only to have it not make a dime? Do you follow the "systems" out there to a "T" and still not achieve any of the results that you were promised? Would you like a way to create a site that doesn't involve creating tons of products before you actually make some money? If so, this what you are about to read is going to give you a plan for doing just that and best of all, with Web 2.0 style! The reason that you are here is because you want to learn how to create a website that gets tons of free traffic. We both know that the first step is to create a site with good content that gets people interested enough to visit your site and stay for a while; A content site. There are so many courses out there that promise to teach you how to create a content site and generate traffic but the truth is, most of them fail to deliver. And that's not just build up, most of them really don't work and the ones that do work usually require that you invest a ridiculous amount of money up front or even hire people. Pretty daunting when you think about, isn't it? But the truth is, this has all changed due to... The Web 2.0 Super Tech Phenomenon... Unless you've been under a rock, you have certainly heard the term Web 2.0. There are hundreds of sites that open up something called the "social factor" that allow real visitors to see your site and judge it. This can be by book marking it socially, blogging about it socially, posting it on a social networking site, etc. These are all Web 2.0 sites and services. These sites have quickly become the standard in judging, rating and sharing information and websites on the Internet. And just to clarify, when I said "super tech", I didn't mean it was complicated. It's actually super easy and all the "complicated" stuff happens behind the scenes so you don't have to worry about it! The search engines have also taken heed to the Web 2.0 and Social rush and are actually increasing the rankings of sites that are bookmarked, blogged and talked about on social networks. This is because search engines like Google know that Web 2.0 and social networking are the way of the future and the way the Internet is

headed as a whole. The best part about the whole Web 2.0 phenomenon is that... You Can Get Tons Of Targeted Traffic Without Huge Advertising Budgets & Without Complication! The Web 2.0 rush has really leveled the playing field for people like you and I who don't have unlimited ad budgets like other big companies. This means that you can get just as much traffic as them, even more in some cases, just by using Web 2.0 as a way of marketing your business. You can also get other people to create your content for you automatically which is absolutely amazing and a huge time saver. Social networks have made it possible for "the people" to vote on your site and have their opinion heard by not only you but also by the search engines. This is incredible! So if you have content that people are interested in, the social nature of the Internet now allows them to vote on it, comment on it and share it with their friends in a way that makes the search engines take notice! This means tons of traffic for you, high search engine rankings and a site that the search engines put up on their "high list" of quality sites. Eventually, with enough positive social feedback, you will obtain the coveted title of "Authority Site" which will boost your traffic into super drive. I'm talking about traffic that will make you upgrade your servers here! Create A Content Site Effortlessly While Using Web 2.0 Ninja Moves To Generate Tens Of Thousands Of Visitors EVERY Month!
