===== 1. I'm blown away! Now I have an iPhone on my Motorola! - Bill A., Colorado 2. My

phone is now an iPhone! (Repeat 300 times!!!) I love your software! - Jenny A., South Dakota 3. I recommend your software to all my friends who want an iPhone! At only \$17, its a steal! Youve saved me tons of money! - Janice Wells, New York 4. You rock man! Thx for the GREAT SOFTWARE! Have a good one, - Neil K., Arkansas 5. just wanted to drop you a note to let you know how much I like the software. It's beautiful. Im so excited! Thank you! - Robbie K., California 6. thank you very much! This software is awesome! - Denise K., Illinois 7. I really appreciate the rapid response. A GREAT product with excellent customer care. Great deal! - Mandy P, New York 8. ABSOLUTELY BRILLIANT! Very impressed with the software. It works perfectly. Thank you so much! :) - James C., United Kingdom 9. We have analyzed your products. We found it very well engineered. My woman und I spent about 47 minutes to completed the process. We love it very much. Vielen Dank, mein Freund! (Thank you very much, my friend!) - Dirk Stoffskopf, Bavaria, Germany. 10. AMAZINGGGG! It works and I love it so much! iPhone is so expensive here now I have my own one without buying one. ITS A SUPER DEAL! Kapil W., Australia 11. Thank you for your timely response, for US\$17 bucks, that is more than something i expect. Excellent! - Dirk M., Germany 12. As advertised, it worked perfect. Very easy to install and deploy. I have love my Samsung phone (now my iPhone!) as much as I do and Ive already suggested it's use to several other people. -

Wallace S., United Kingdom Part 2 or 3: Installation ===== STEP 1 - Install WisBar Advance Desktop In this step you will install the WisBar Advance Desktop. "The WisBar Advance Desktop replaces your existing Today screen. Using WisBar Advance Desktop, you can create shortcuts, system meters, floating windows and virtual pages to extend the functionality of your PocketPC." by lakeridgesoftware.com Compatible: QVGA Download Included With Package. Website: lakeridgesoftware.com. (Please Note: Newer versions might not be compatible) STEP 2 - Install WisBar Advance 3.x The first step is to install the WisBar Advance. "The WisBar Advance brings new life to your PocketPC with the ability to change the appearance of your system to a degree not matched in other software." by lakeridgesoftware.com Compatible: QVGA Download Included With Package. Website: lakeridgesoftware.com. STEP 3 - psShutXP (Optional) In this step you will install the psShutXP by ppcsoft.narod.ru. This program will allow you to turn off, display off and restart your Pocket PC. The program is completely skin-able. Compatible: QVGA Download Included With Package. Website: ppcsoft.narod.ru/english/ (Please Note: Newer versions might not be compatible) STEP 4 - gCalc (Optional) In this step you will install the gCalc v1.0. The gCalc was written by an individual who thought

the Pocket PC calculator was no good, so he in turn created an amazing calculator that is skin-able.

Compatible: QVGA Download Included With Package. STEP 5 - Weather Panel (Optional) In this step you will install the Weather Panel by marsware.net. The weather program is a great program and

included in our iPhone Theme package. If you wish to download the latest version of the Weather Panel then use the links below. Compatible: QVGA Download Included With Package. Website: marsware.net

(Please Note: Newer versions might not be compatible) STEP 6 - SlideUnlock (Optional) In this step you will install the iPhone Slide Unlocker. This version of the SlideUnlock will load up when your phone comes out of sleep just like the iPhone! You can also customize it by changing the backgrounds! Compatible:

QVGA Download Included With Package. STEP 7 - iPhone Dialpad In this step you will install the iPhone Dialpad Theme. This is a custom Dialpad theme that looks just like the iPhone Dialpad! Download

Included With Package. STEP 8 - The iPhone Theme Package This step is to install the iPhone Theme Package. These packages contain the complete skins to all the applications to complete the look of the actual iPhone. Extras/Optional Software: -----

Google Maps for mobile is a free download that lets you view maps and satellite imagery, find local businesses, and get driving directions on your mobile device. Its very nice and you can download it free from Google. Happy Tapping Keyboard is a free

download that is a very nice iphone style keyboard skin for your Windows Mobile Pocket PC. Download Instructions Included With Package. (Recommended) Picxel Browser is a nice full page web browser that you can scroll around with just your finger. It has alot of nice features and its recommended you try it out.

Download Instructions Included With Package. (Recommended) Pocket Suspend FX is a small program for the beautiful disconnection Pocket PC with different visual effects. Download Instructions Included

With Package. PocketCM and PocketCM Keyboard are awesome apps for the PocketPC that looks like an iPhone iContacts and the iPhone Keyboard. Download Instructions Included With Package. iContact is another nice contact program that you can scroll with your finger just like the iPhone iContacts. Download

Instructions Included With Package. Part 3 or 3: Q & A ===== Q: - How do I install a CAB file? A: Installing a CAB file is very easy. you just download the CAB file to your device. (preferably to your memory card). Then you just navigate to it on your device though Explorer and click on the CAB file. The CAB file will then start the install. If your still not sure you can search Google:

google.com/search?q=install+cab Q: - What if I get a .NET error? A: On a rare occasion you might get a .NET error. If you do you can download the the .NET software by Clicking Here. Just copy it to your

device's memory card and click on it to install. Q: - What if my Wisbar has expired? A: You will get a 7 day trial of Wisbar with this theme. If you continue to use it after 7 days you will need to register it. You can register and download the full version of Wisbar Advanced and Wisbar desktop at: [lakeridgesoftware.com](http://lakeridgesoftware.com)

Q: - How do i customize the buttons? A: Its very easy to customize the button. Just click and hold your stylus pen on a button and choose properties. From there you can change many options. Watch my instructional video below: Q: - How do i change the Quick Dial Pictures? A: Press the Phone button .

Then you will see five acquire blocks. Hold your stylus on one of the blocks you want to change and then choose "Properties". The first option is "Path To Executable", This is where you put the phone number. Next click on the images button below and change your picture. The recommended picture size for this is 45 X 45. Next make sure the check box is checked for "Shortcut is phone number". that's it. Watch my

instructional video below: Q: - Why after following the steps do I just have a blue screen? A: This is because "Wisbar Desktop" has expired. Not "Wisbar Advance" but "Wisbar Desktop". Do not confuse the two applications. They are both required and if one has expired then it will not work. After you register them you may now have to do the following manual imports again. 1. Go to "Start" "Programs" "WisBar

Advance 3" "WisBar Advance Settings". 2. Select "Theme" "Desktop Theme" Click "Import" Button Browse to "/Themes/desktop/iphone\_wa/" Select File "iphone\_wa". 3. Click "OK" Click "OK" Click "Ok" Click "Ok" NEXT: Second, Lets configure Wisbar Desktop: "QVGA" 1. Go to "Start" "Settings"

"Theme Manager" 2. Click "Desktop Theme" Click "Import" Button Click the big Arrow Down to Browse to "/Themes/Desktop/WAD\_iPhone/" Select "iphone\_portrait" Click "OK" 3. Click Tab "Landscape" Click "Import" Button Select "iphone\_landscape" - Click "OK" 4. Click "OK" (Exit Theme Manager)
