Mass url,Internet Marketing Script Shrink Your Long Links Using The Mass URL Software!" Have you ever used TinyURL to mask your affiliate links or post on to shorten a long URL for Twitter? You simply enter the affiliate URL and it gives you a short one you can add to an email. But there are a few BAD things about TinyURL: 1. The TinyURL domain is blacklisted. That means if you use that URL in an autoresponder email, it will most likely end up in the spam box. 2. If you want to make a LOT of URL's (for example, if you had 15 clickbank affiliate links you wanted to make "tiny") then it takes a long time. 3. When you use a service like TinyURL, they can see ALL the traffic going to and from that link. They can even find competitive data like where the user came from, what type of webbrowser they were using, what country they live in, etc... This probably isn't a HUGE issue with TinyURL, but it's nice to keep things as secure as possible. MassURL takes care of ALL these issues. MassURL is hosted on ANY domain you choose, and you can use it on as many as you like. NOTE: To use MassURL, you will need a server that supports .htaccess. Please call your hosting company to verify your server works with .htaccess.
