"At Last The Breakthrough Software Youe Been Waiting For - "SoftwarePak's Java Script Pro" Make Your Web Pages Come Alive With Our Easy To Use Software! Push A Few Buttons And Generate Professional Looking Java Scripts For Your Website! What Exactly Can The Software Do? Java Script Pro is a revolutionary software that will turn you into a PRO webmaster overnight! 15 different website scripts are built into the software. All you have to do is push a couple buttons and the customized code will be rendered. You can also preview the effect from within the software. Paste the code into your site and watch it come to life! You Won't find a comparable product to Java Script Pro! Take a look at what Java Script Pro can do for your website! Blur Text-This script creates an eerie aura around your text similar to a motion blur. A great visual effect! Multi-Search Engine-Your visitor can enter in their search term then choose which engine they'd like to search from a drop down menu. Page Fade In-Create a GREAT intro for your site! This script loads a blank screen and then fades the visitor to the site you're sending them to. Flying Text-This script creates a pattern of 8 sets of words to follow as the mouse moves around the screen. Alerts-A great script that allows you to welcome and say goodbye to your visitors! No SPAM Email- A script that keeps your email address from being spidered by those pesky SPAM robots. Number Countdown-Create a countdown on your website. Great for showing when those offers expire! Refresh-Redirect-Automatically forward your visitors to another page after a given time. Dictionary/Thesaurus- A great script that allows your visitors to query related terms Exit Windows-Make that last sales pitch before your visitor leaves your site. Auto Pop And Close Window- Make windows that automatically open, and then close after a given time period. Jumping Text-A great script sure to grab their attention! Link Message-Hide affiliate ID's! Browsers wont be able to view the REAL link address, but instead the message you put in the status bar. Typing In Status Bar-Another attention getting script. The status bar continuously changes! Status Bar Wiper- Another fancy display down in the status bar.
