"Who Else Wants An Easy Way To Create Their Joomla Templates WITHOUT All The Hassle?" Here's a Complete Solution and you DON'T need any HTML or PHP experience. I was totally amazed when I first started using Joomla. For what was a BRILLIANT Content Management System, it seems to me so complex when it came to designing the Templates. Arcane instructions left me bewildered. I really didn't know which way to turn. I began by 'buying in' ready made templates and trying to convert them. But there was something missing. Trying to embed my own graphics was a nightmare. What I needed was a simple way to take my own graphic headers etc and create a Joomla Template Package ready to rock 'n roll. Sure there were plenty of Dreamweaver Add-On's but I need something that would run directly from Windows - a kind of simple Q+A - Fill in the Blanks and Go. And so I got it made and I'm passing on the benefits to you. Tags: im, plr
