Mini Sites are simple (but powerful) one or two page web sites that sell a product -- usually, an infoproduct. These apparently harmless sites, when done correctly are unstoppable money-making machines. If you've been on the net some time and if you're interested in the topic of "online marketing", I'm sure that you've seen some of the sites I'm talking about... and chances are you even bought from several of them. Right? Yes, that's how powerful they are... Actually, mini-sites are in my opinion "the perfect web business". And how couldn't it be if... Mini-sites are quick and easy to produce Mini-sites allow you to test your marketing on the go Mini-sites provide instant results Mini-sites have *huge* response-rates The fact is that if you're still not embracing the power of mini-sites to sell your products online, you might as well quit the online marketing race altogether and flush your money down the toilet! But be warned: Slapping up a one-page site and hoping to make a zillion dollars in sales is not all it takes. Killer mini-sites are studied psychological weapons that need to be created with the proper care. Ahhh... but when done correctly, a mini-site can make your sales and profits explode like nothing you've ever seen before! Do you know *exactly* what it takes to create a Killer Mini-Site that makes prospects buy? If you don't, you're not alone... Creating a mini-site that makes visitors flip-out their wallets and order your products is not as easy as it looks. Most people don't know the "behind the curtains" look at how to grab the reader by the throat and pull him into your site, how to write eye-grabbing copy, how to ask for the order, etc. These and other variables are the ones that make the BIG difference between one-page-duds and "Killer Mini-Sites". Here's the good news... I have written a special report entitled: "How to create killer mini-sites that sell like crazy! . Here's what experts are saying about it.
