A unique blending of styles: acoustic folk/pop, electric rock and blues; richly textured compositions coupled with intellectual and introspective lyrics, sung with gut-wrenching honesty. 9 MP3 Songs ROCK: Acoustic, FOLK: Modern Folk Details: Juxtaposition is exactly what it says it is: a refreshingly unique blending of styles, from acoustic folk/pop to electric rock and blues richly textured guitar compositions coupled with unusually intellectual and introspective lyrics, sung with gut-wrenching honesty. The whole is much more than the sum of its parts. Imagine some mad guitar wizard producing a hybrid of Ronnie Montrose and Leo Kottke and then marrying it off to a wild siren sprung from the DNA of Joni Mitchell, Stevie Nicks and Janis Joplin. Their offspring might be Enigma. Enigma is a dynamic performing/songwriting team out of Southeast Nebraska, but don't hold that against them. (For more bio information, check out their website.) Guitarist and composer David Epp jokingly describes his work as, a combination of mess and finesse. An eclectic musician, Epp draws from a variety of inspirations to produce provocative works speaking to and from every corner of the soul. His inventive writing style and powerful expression provide a beautifully complex framework for vocalist/lyricist Carolyn Olesen, who herself is an amalgam of incurable rebelliousness and rigid discipline. Her lyrics explore joy and sadness, clarity and madness, past intermingled with present; from sassy to sublime, abject fear to just plain fun, Olesens poetry and delivery reflect the depth and extremes of human experience. Everything is interconnected. Nothing stands absolutely alone.
