

The Ultimate Viral Script - Like List V1.2 With Mrr

[DOWNLOAD HERE](#)

This is really the EASIEST way to gain access to Facebook's MASSIVE traffic! You can literally get HUNDREDS OF THOUSANDS of daily visitors AND HUNDREDS of Facebook Pages with HUNDREDS OF THOUSANDS FANS!!! PRESENTING LikeList v1.2 But WHAT IS this script? I'll explain it simply. What this does is to help you easily create a quotes website that Facebook users can "like" and that is heavily focused around this. Since the stuff they like show up in their FB profile and consequently in the news feed of their friends, this makes the whole website EXTREMELY viral! Except of text quotes, there can also be pictures and youtube videos! Also, websites created with LikeList are sentenced to live and grow on autopilot because users add their own content! Having the internet marketer's needs in mind, I created what I believe to be the perfect Facebook viral marketing tool, that works as an automatic way to make money on FB. It is maybe the best and easiest next-to-free way right now to generate a HUGE amount of leads and to multiply your list; it's designed to be as simple, easy and enjoyable to use as possible for the users, while as effective and easy to maintain as possible for the site owner. After you set up your site and with literally next to zero promotion, by the time the first users start using your site, more users will follow, that will bring even more, and then EVEN MORE, etc, while you sit and watch your earnings skyrocket! The other huge part of LikeList is that all the entries of your sites are actually FACEBOOK PAGES. This means that if the top 50 entries have been liked by 100.000 people, then you have 50 PAGES WITH 100.000 FANS, that you can send updates AGAIN AND AGAIN!!! And since the whole website is built around liking things, these numbers are easily achievable! You'll have a HUGE userbase in no time! Some numbers I've achieved by just testing this in a limited population country like Greece: On just a test website, I have up to 25.000 daily unique visitors and also got over 20.000 fans in more 50 FB pages and that's with less than 2 hours of work of setting it and just spreading it in my immediate social circle (I haven't tried to actively promote this yet).... Imagine what YOU can achieve. But there's more than simply that: There is an integrated CMS with a full WYSIWYG editor, with which you can easily create pages integrated in the website (that can also be liked and be virally spread over Facebook!). What, even THAT isn't enough for you? Well, there is even an integrated feature to add an

e-mail sign up form in the with an export as .csv option. There are also features such as daily trending quotes, an integrated ad manager, full integration with other Facebook functions, and many more (check below)! And in top of all these, you get the options to add social features to your site, like a commentbox feature, or an activity feed that shows the users that did the latest likes. With all these, your visitors will not want to leave the site and will make it a money generating machine. It's not magic yet, but it's DAMN EASY! And finally -and maybe the best of all: you can make a NETWORK of INTERCONNECTED sites, that grow on top of each other, and work as a really big automated site! My 3 TEST sites together get MORE THAN 50.000 daily visitors in a small country!!! (I can personally set this up for you only for \$15 for the first 2 sites+\$5 for every extra site) But detail is what makes the best, and that's what 've been targeting here... I've spent days and nights researching FB API... I wanted to make this perfect. And I believe I did it. I've passed it through extensive testing and fine-tuned it so that it really is as good as it can get. LikeList is virtually bug free, it's fast and light for the user AND the server, it's easily customizable, it's REALLY secured, and the design and architecture are tweaked so to give the best feeling when browsing the site. With LikeList you CAN make money while you sleep! Most important and unique features are: Easy and efficient design. Supports Text, Image, YouTube likes. Practical admin panel providing many useful tools. Pinning feature - You can put a specific entry on top of all others, which can be a up as suggested in each page load (this can also be a textlink or a banner!) You can add FULL HTML CUSTOMIZATION on any entry you enter from the admin panel. CMS with a fully functional WYSIWYG editor (so you can easily create additional pages for whatever you want). Integrated ad manager. Show trending, latest, top and random quotes, and the ability to sort these as you like. Optional "Add your e-mail" form. SEO friendly URLs. Social activity feed to show latest people that have liked something. Facebook comments on every page. RSS feed with the latest quotes, that can be enabled/disabled and customized. Security from spambots using Google's ReCaptcha technology. Ability to like whole pages. Adding and deleting entries. Users can report entries that should be deleted EVERYTHING you read above is easily customizable. LikeList is the tool that helps you have access to a MASSIVE amount of traffic, FOR FUN!
