Each day for the next 20 days you are going to receive an email lesson that will introduce you to different traffic methods that you can use to attract more visitors to your website. When it comes to generating traffic the simple fact is that quality out weighs quantity every time! While attracting millions of visitors to your website is the dream of every webmaster, your approach towards traffic generation should be focused on the quality of traffic that you attract and not so much on the numbers in your traffic stats! When you focus on quality (targeted) traffic rather than quantity you will achieve much better results for your efforts and I guarantee you will experience better conversions and make more sales. What are the best ways to attract traffic to your website? Let's jump right in and talk about one of the most basic methods of attracting free traffic to your website and that is SEO. SEO (Search engine optimization) has been a standard in the online marketing world for several years. Basically it means making you website more accessible by the search engines. When you begin optimizing your websites you should consider the three major search engines; Google, Yahoo and MSN. They all have different parameters for organizing their links. Out of these Google is the most popular. Google is a context based search engine (which means it ranks content-rich websites higher than others). Here are some basic methods that you can use to improve you Google PageRank: - One way that Google ranks webpage's is based on the number of popular keywords that a page contains. So you must research good keywords and use them in your content. - Apart from keyword optimization, the overall content matters as well. There must be at least 250 words of content on a webpage for it to even be considered by Google. - The content on your site needs to be regularly updated. Google is looking for content that provides value to the reader. Content that keeps changing is looked upon as dynamic

content that the visitor would like. As you begin your quest for traffic you will discover that virtually all methods of traffic generation are based on basic SEO methods. Simply because Search engines like Google keep a close eye on the popularity of websites and according to them, if a website is visited more, it contains value and that is how you want your site to be seen. Over the next 20 days we will be going over many traffic methods including more SEO. So make sure you look for your next lesson soon. We will be talking about using articles to get tons of free traffic. I'll speak to you soon [enter your name here]
