Minimal glitchy atmosphere's complimented by spare soft rhythms and gentle, yet moving, shades of melody. 8 MP3 Songs ELECTRONIC: Ambient, ELECTRONIC: Soundscapes Details: beta2agonist was born in 1976 in Barcelona, son of a Catalan musician and a Dutch mother. He attended art college around 1998. There he discovered the computer as a valuable tool, while picking up the mindset of experimentation and openness. Through the years the borders between music and noise were blurring. He discovered that error and chance can be wonderful, and captures those magic moments in audio. He also uses field recordings, percussion and other objects, circuit-bent toys and contraptions, synths, effects pedals and software. All music is dedicated to the unbearable lightness of being and the beauty hidden everywhere.
