

Club Drum Track Builders(rex2)

[DOWNLOAD HERE](#)

CLUB DRUM TRACK BUILDERS contains all the primary elements for any Dance music producers looking to program their own club-oriented rhythms. This pack is organized into 3 folders containing the following elements: no-kick dance drum loops, single drum loop elements(kick drum loops, snare drum loops, hi-hat loops, percussion,etc...) and a third folder with 285 single drum sounds. The loops are presented in REX2 format so you can use them at virtually any tempo as they automatically adjust to your arrangement. CLUB DRUM TRACK BUILDERS will allow you to create your own dancefloor beats by giving you the flexibility of combining drum loops with hundreds of other single drum loops elements that you can mix and match. If you create club-oriented music(Electro-House, Trance, Techno, Deep House, Progressive, etc...), in this pack you'll have endless of groove combinations possibilities!! FEATURES: - 200 no-kick Dance drum loops in REX2 format, each loop comes with 2 or 3 variations; - A folder with 390 individual drum loop elements featuring kick drum loops, snare drum loops, hi-hat loops, percussion loops, breakbeat loops, drum rolls and FX loops. All in REX2 format; - 285 individual drum sounds in 44KHz/16bit WAV format featuring kick drums, snares, hi-hats, percussion hits, crash cymbals, claps and reverse cymbals; - All loops are 44KHz/16bit REX2 format; - All Royalty Free. Check out the demo by clicking the preview button above. Alternatively, you can download a free demo pack containing sounds taken from this collection, it is available from our FREE SOUND PACKS section that you can find in our product page, here is the link: equinoxsounds.com/products.htm COMPATIBILITY: Propellerheads' proprietary REX2 format allows time stretching in compatible software and can be imported into the Stylus RMX virtual instrument, Cubase, Reason, Logic, Digital Performer and many other audio programs supporting REX format files. Now as an open format, any manufacturer, large or small, can support REX2 playback in their applications.
