

# Slide Up Fx

[DOWNLOAD HERE](#)

With Slide Up FX,..... Easily design and create effective and unobtrusive slide up adds for all your sites ! All you have to do is take this script and install it on your webhosting account or server. Run the program and customize it to display whatever data you want. Save the settings, copy the code, and paste it on your web page. After you do this, upload your web page to your web host server. Now, any time someone lands on that page, an ad you created will slide up on the screen. It will look like it is a part of the web page itself. The ad wont be a popup or a hover ad. Instead, the ad will slide up on the screen. This guarantees it will stay there longer and get noticed. If your goal is to increase sales or your opt-in list, placing my script on your web page will accomplish that goal and more. The great part of the slide up ad is it is not a popup or hover ad. It can still be closed if you dont like it there, but the ad will get more attention as it fills up the bottom of the screen.
