

Loop Unit - Construction Kits - Modern Jamz (wav/rex)

[DOWNLOAD HERE](#)

What do Black Milk, Lex Luger and Vybe Beatz among others all have in common? These producers are debatably the new pioneers of the contemporary hip hop sound. From huge commercial top 10 hits to underground mixtape classics and everything in between, this new breed of hip hop producers are tearing things up from coast to coast. So what's their secret? how have they managed to rise above the saturated market while many thousands of talented producers remain anonymous?. There are many obvious answers to this including the fact all of them have an superb ear for picking the best samples/melodies and flipping them in a unique way but surely many bedroom producers are doing that very same thing? The secret is in the sounds....You could have the sweetest flipped vinyl soul loop but if its layered with weak drums, wack bass and lifeless keys then its never gonna reach its full potential. If you want your beats to take on the big professional sound and for them to punch right where it matters then you need the right tools, turn that perfect sample into a hit, drag that demo onto the next level and start making beats like you've always wanted to. *Professional Hip Hop Construction Kits *Each Instrumental Split into Separate Loops *Each Drum Loop Split Into Individual Loops For Full Flexibility *Bass Loops, Synth Loops, Percussion Loops, Vocal Samples *Perfect For Remixing, Enhancing Your Beats, Vocalists and MC's *Professional Sounding Loops Affordable For You! Another feature packed construction loop set filled to the brim with hard hitting drum loops/hits, gorgeous keyboard melodies, atmospheric pads and so much more...
